QUESTION 1

Which three are proper applications of Oracle Service Bus?

- A. An existing Java web service is made available to clients running transports and protocols not originally planned by the original developers. No modifications to the web service implementation are required.
- B. A request is transformed and routed to an appropriate service endpoint based on the content of the request message. All complexity of the supporting runtime protocol selection is hidden
- C. A request for a large graphics job is split into smaller pieces that are processed in parallel by an existing rendering service. After all of the pieces have been processed, the results are joined to create a single response.
- D. A request containing a complex family tree is validated before being routed to an existing genealogy service. Recursive logic is implemented to validate that all relationships in the tree are consistent.
- E. A request for a background check is conditionally routed between multiple third-party validation services with different service-level agreements. Remediation must be handled if any one of the validation service calls fails.

Correct Answer: ACD

QUESTION 2

Your company has a checkCredit service used in the sales process and your organization plans to roll out a new sales mobile application.

Identify two approaches that you can use to develop the new mobile application.

- A. Develop a template for the checkCredit service.
- B. Expose the checkCredit service with a REST interface.
- C. Create a BPEL subprocess for the mobile application request.
- D. Use JSON for payload.

Correct Answer: C

QUESTION 3

You defined an event. You now want to trigger that event from an existing Mediator component.

How do you link the event to the Mediator so that the Mediator can raise the event to the Event Delivery Network (EDN)?

- A. Use the SOA composite editor to specify the event as a property on the incoming wire into the Mediator component.
- B. Use a text editor to modify the .edlfile that defines the event so that the Mediator is identified as a publisher.
- C. Use the SOA Composite Editor to add a raise action to the Mediator's .mpln specification file.

D. Use Enterprise Manager to associate the Mediator with the appropriate event.

Correct Answer: C

QUESTION 4

As an Oracle SOA Suite composite moves through the software development life cycle, certain environment-specific changes must be made to the composite configuration from deployment to deployment.

Which feature can help you capture and effect these changes?

- A. Configuration Plans
- B. Deployment Plans
- C. Domain Value Maps
- D. Property Files

Correct Answer: A

QUESTION 5

Identify two correct statements about Oracle Event Processing (OEP).

- A. It is a platform to develop and execute applications that process streaming data.
- B. It is designed to connect businesses using standards-based event communication protocols.
- C. It is a powerful CQL engine that performs filtering, aggregations, calculations, and pattern matching in near real time.
- D. It is an implementation of the Service Component Architecture (SCA) to process streaming data using regular expressions.

Correct Answer: C
