### QUESTION 1

Given:

```
public class DoubleThread {  
    public static void main(String[] args) {  
        Thread t1 = new Thread() {  
            public void run() {  
                System.out.print("Greeting");  
            }  
        };  
        Thread t2 = new Thread(t1); // Line 9  
        t2.run();  
    }  
}
```

Which two are true?

- A. A runtime exception is thrown on line 9.
- B. No output is produced.
- C. Greeting is printed once.
- D. Greeting is printed twice.
- E. No new threads of execution are started within the main method.
- F. One new thread of execution is started within the main method.
- G. Two new threads of execution are started within the main method.

Correct Answer: CE

Thread t2 is executed. Execution of T2 starts execution of t1. Greeting is printed during the execution of t1.

---

### QUESTION 2

You have been asked to create a ResourceBundle file to localize an application.

Which code example specifies valid keys menu1 and manu2 with values of File Menu and View Menu?

- A. File Menu View Menu

- B. menu1File Menu menu1View Menu
- C. menu1m File menu, menu2, view menu
- D. menu1 = File Menu menu2 = View Menu

Correct Answer: D

A properties file is a simple text file. You can create and maintain a properties file with just about any text editor.

You should always create a default properties file. The name of this file begins with the base name of your ResourceBundle and ends with the .properties suffix. In the PropertiesDemo program the base name is LabelsBundle. Therefore the default properties file is called LabelsBundle.properties. The following example file contains the following lines:

```
# This is the default LabelsBundle.properties file  
s1 = computer s2 = disk s3 = monitor s4 = keyboard
```

Note that in the preceding file the comment lines begin with a pound sign (#). The other lines contain key-value pairs. The key is on the left side of the equal sign and the value is on the right. For instance, s2 is the key that corresponds to the value disk. The key is arbitrary. We could have called s2 something else, like msg5 or diskID. Once defined, however, the key should not change because it is referenced in the source code. The values may be changed. In fact, when your localizers create new properties files to accommodate additional languages, they will translate the values into various languages.

### QUESTION 3

Given the code fragment:

```
Given the code fragment:  
5. public static void displayDetails() {  
6.     try (BufferedReader br = new BufferedReader(new FileReader("salesreport.dat")))  
7.     {  
8.         String record;  
9.         while ((record = br.readLine()) != null) {  
10.            System.out.println(record);  
11.        }  
12.        br.close();  
13.        br = new BufferedReader(new FileReader("annualreport.dat"));  
14.        while ((record = br.readLine()) != null) {  
15.            System.out.println(record);  
16.        }  
17.    } catch (IOException e) {  
18.        System.err.print(e.getClass());  
19.    }  
20. }
```

What is the result, if the file salesreport.dat does not exist?

- A. Compilation fails only at line 6
- B. Compilation fails only at line 13
- C. Compilation fails at line 6 and 13
- D. Class java.io.IOException
- E. Class java.io.FileNotFoundException

Correct Answer: D

Compilation works fine.

There will be a runtime error at line 6 (as the file salesreport.dat) does not exist.

This will be caught as an IOException at line 17.

---

#### QUESTION 4

Given the classes:

```
class Pupil {  
  
String name = "unknown";  
  
public String getName() {return name;}  
  
}  
  
class John extends Pupil {  
  
String name = "John";  
  
}  
  
class Harry extends Pupil {  
  
String name = "Harry";  
  
public String getName() {return name;}  
  
}  
  
public class Director {  
  
public static void main(String[] args) {  
  
Pupil p1 = new John();  
  
Pupil p2 = new Harry();  
  
System.out.print(p1.getName() + " ");  
  
System.out.print(p2.getName());  
  
}  
  
}
```

What is the result?

- A. John Harry
- B. unknown Harry
- C. john unknown

- D. unknown unknown
- E. Compilation fails.
- F. An exception is thrown at runtime.

Correct Answer: B

---

### QUESTION 5

Given:

```
import java.util.ArrayDeque;
import java.util.Deque;
public class Counter {
public static void main(String[] args) {
Deque deq = new ArrayDeque(2);
deq.addFirst("one");
deq.addFirst("two");
deq.addFirst("three"); // Line 9
System.out.print(deq.pollLast());
System.out.print(deq.pollLast());
System.out.print(deq.pollLast()); // Line 12
}
}
```

What is the result?

- A. An exception is thrown at runtime on line 9.
- B. An exception is thrown at runtime on line 12
- C. one two null
- D. one two three
- E. two one null
- F. three two one

Correct Answer: D
