QUESTION 1

Refer to the exhibit to answer the question.

1.
Using YourCo marketplace, companies can quickly search and locate products and services online.
 2.
Once a company finds a products or service suitable for their need, the company can solicit pricing information (quotations) from various sellers.
 3.
Multiple sellers of a same kind product or service can bid to sell a product.
 4.
Once the company finalizes the desired product(s), price and seller, it notifies the seller sends an invoice to the customer.
 5.
The marketplace interacts with banks on behalf of the sellers and buyers to execute the financial transitions of an exchange.
- XML will be used extensively for data exchange between heterogeneous entities.

XML will be used for data exchange between the marketplace application and banks. The XML will specify the structure of the document, constraints and datatypes. The bank has a custom application that uses its own XML vocabulary to interface with its transaction processing application. Exposing the bank's application as a Web Service is an immediate future enhancement. The design for the banking application will MOST logically contain:

- A. XSL F0
- B. XSL Transformations
- C. XSL and CSS
- D. XML Schema
- E. Fault Handling

Correct Answer: BDE

QUESTION 2

A developer has been asked to select a technology to define an XML vocabulary. The XML documents contain the following types of data: Phone number, Currency, Driver's license number, Height, Weight, and Age. Which XML technology will be well-suited to solve this problem?

- A. XPath

- B. XSLT
- C. XLink
- D. XML Schema

Correct Answer: D

QUESTION 3

Which of the Following MUST be present in every SOAP request?

- A. SOAP Envelope SOAP Header, SOAP Body
- B. SOAP Header, SOAP Body
- C. SOAP Envelope, SOAP Body
- D. SOAP Envelope, SOAP Header

Correct Answer: C

QUESTION 4

From the XPath specification, which of the following axes, when combined together, reference all nodes in a document, except the namespace and attribute nodes?

- A. Self axis
- B. Following-sibling axis
- C. Descendant axis
- D. Preceding-sibling axis
- E. Ancestor axis
- F. Preceding axis
- G. Following axis

Correct Answer: ACEFG

QUESTION 5

A company has a large customer database with over 100,000 entries, which will be processed as an XML document. The marketing and retail groups need to be able to use these entries in a variety of ways, such as by region or specific customer telephone number. There may be unforeseen ways to search the entries in the future. Given these requirements, which of the following is the BEST approach to achieve good performance?

- A. Define id() functions for the different entry perspectives.

- B. Define id() functions, one for each customer entry.
- C. Define key() functions for the different entry perspectives.
- D. Define key() functions, one for each customer entry.

Correct Answer: C
