QUESTION 1

Consider the following scenario: A company needs to display employee contact information in its intranet. The information is available in XML Format from an XML-aware employee database. It is required that the top of document should contain an index of employee names, so that clicking on an employee name will display the employee's complete contact information (including the employee's name). Which of the following is the BEST approach to meet this requirement?

- A. Create a master stylesheet that includes two stylesheets, one to generate the index, and another to generate the complete information.
- B. Create a stylesheet with two templates in different modes, and use them in the mode attribute of .
- C. Create a stylesheet with one template, and selectively use with to generate the index information.
- D. Create a stylesheet with one template, and use to generate the index information.

Correct Answer: B

QUESTION 2

An XML developer wants to leverage XML-related capabilities to convert an XML Schema into an object-based programming language's classes. What would be the BEST mechanism, if any, to accomplish this goal?

- A. Write an object-based application that reads the XML Schema and converts all the primitive datatypes to an object-based programming language's classes.
- B. Write an XSLT stylesheet that transforms the XML Schema to an object-based programming language's classes, using . C- Write an XSLT stylesheet that transforms the XML Schema to an object-based programming language's classes, using .
- C. There is NO relation between XML Schema and an object-based programming language's class.

Correct Answer: B

QUESTION 3

Consider the following partial stylesheet:

...

Which of the following is TRUE concerning the variable "x"?

- A. Both "x" variables refer to the same instance.
- B. The local variable "x" makes the global variable "x" unavailable from inside the template.
- C. The local variable "x" causes an error, due to the global variable "x".

Correct Answer: B

QUESTION 4

A group of companies that currently processes purchase orders (POs) using XML has set up a B2B trading community in order to exchange the POs. Which of the following XML technologies would provide the MOST benefits?

- A. Use published DTD5 to standardize the P0 format.
- B. Use XML Query to retrieve POs from another company's database.
- C. Use XML Infoset to standardize field names between companies.
- D. Use XSLT to transform POs to/from internal P0 formats.

Correct Answer: AD

QUESTION 5

Which of the following represents the BEST reason that the Document Object Model (DOM) might NOT be used in a given XML application?

- A. It is permissible that the application be non-validating.
- B. The application demands complex processing.
- C. The application is subject to significant constraints on memory usage.
- D. The architecture requires the use of attributes.

Correct Answer: C
