QUESTION 1

When creating a profile for a partition, 12 PCI slots show up for an I/O drawer planar on a p670/p690. Which of the following is the most likely reason why this would occur?

- A. A dual slot adapter has been installed in a PCI slot in the planar.
- B. The internal ultra-3 SCSI adapters for the disk packs show up as PCI slots 11 and 12.
- C. The system can access these slots via the media drawer card in slot 10.
- D. A hardware error occurred when the system was set up.

Correct Answer: B

QUESTION 2

A customer has an 8-way POWER4 p650 system. They have one partition running AIX 5.2, two partitions running AIX 5.1, and one partition running Linux. What is the procedure to move processors between partitions?

- A. Create new profiles on the HMC for the partitions to be moved. The new profiles will be dynamically activated.
- B. Create new profiles on the HMC for the partitions to be moved. Shut down both currently active profiles. Manually select and activate the new profiles.
- C. Use the graphical user interface or command-line function of the HMC to dynamically move the resources from any of the partitions to the AIX 5.2 partition.
- D. Use the graphical user interface or command-line function of the HMC to dynamically move the resources from one of the AIX 5.1 partitions to the AIX 5.2 partition.

Correct Answer: B

QUESTION 3

If an administrator logs in remotely to the HMC as the hscroot user, the command line can be used to perform all of the following administrative tasks EXCEPT to

- A. power on and off the HMC.
- B. activate and reset partitions with selected profiles.
- C. create and delete partitions and profiles.
- D. query the state of all running partitions.

Correct Answer: C

QUESTION 4

Under the HMC Managed System pull-down menu, there is an option for '\\Profile Data\\'. Under this selection, one can save profiles, restore profiles, and initialize profiles. Which action does the initialize profiles option perform?

- A. It rereads the partition and profile information from NVRAM to the HMC.
- B. It removes all the current partition and profile information from the HMC.
- C. It resets the HMC partitions to the administrator defined default partitions.
- D. It resends the current HMC partition and profile information from the HMC to the NVRAM.

Correct Answer: B

QUESTION 5

A customer is planning to migrate Payroll and Human Resources applications to an 8-way p690 system with 32GB of memory. The application data is stored on an ESS attached to a S80 server with AIX 5.1. Which of the following is the quickest way to move all the data stored on the ESS attached to the S80 to the new p690 system?

- A. Use NFS to copy data across
- B. Back up the data from the source system and restore to the target system
- C. Mirror the data, break the mirror and move one copy of the mirror to the p690
- D. Export the volume group from source system and import to the target system

Correct Answer: D
