QUESTION 1

A system administrator is configuring application servers for using the Data Replication Service in a WebSphere Application Server V6 cluster environment. Which of the following replication modes are available?

- A. Client Only, Server Only, Both Client and Server
- B. Cluster Only, Both Client and Cluster
- C. Cluster Only, Both Cluster and Server
- D. Cluster Only, Node Only, Both Cluster and Node

Correct Answer: A

QUESTION 2

A system administrator is having problems starting the application server (server1) Which log files should be checked to get more information about the problem?

- A. SystemOut.log and SystemErr.log under \logs\server1 directory
- B. SystemOut.log and SystemErr.log under \profiles\directory
- C. Log.txt and startWerver.log under \logs directory
- D. Log.txt and startServer.log under system temp directory

Correct Answer: B

QUESTION 3

A system administrator is reviewing a checklist of actions that should occur during the federation process. The system administrator notes that all of the following checklist actions are correct EXCEPT:

- A. The node is added to the cell
- B. The node agent and application server are started
- C. The application server becomes a managed server in the cell
- D. The application server is stopped, and a new node agent is created.

Correct Answer: B

QUESTION 4

After installing IBM WebSphere Application Server and creating a federated cell, a system administrator wants to enable Global security. After making the appropriate configuration changes, which steps must the system administrator take in order for Global security to become fully active?

- A. Restart the Deployment Manager
- B. Restart the Deployment Manager and all Node Agents
- C. Restart the Deployment Manager, all Node Agents and all Application Servers
- D. Restart the Deployment Manager, all Node Agents, all Application Servers and the User Registry

Correct Answer: C

QUESTION 5

A system administrator is creating a new cluster. The servers in the cluster will need several configuration steps to support the applications. Which of the following ways is MOST efficient to create and configure the cluster members?

- A. Create and properly configure a server then add this server as the first member of the cluster.
- B. Create and properly configure as standalone server then add this server as the last member of the cluster
- C. Create the cluster and add all the cluster members, then make configuration changes at the cluster scope.
- D. Create the cluster and add all the cluster members, then set the configuration in any of the clustered servers.

Correct Answer: A
