QUESTION 1

What is the most important rule when defining the data mover for network attached storage (NAS) backups?

- A. The data mover name must correspond to the name of the NAS node.
- B. The data mover user ID must correspond to the name of the NAS node.
- C. The data mover name must be different from the name of the NAS node.
- D. The data mover password must correspond to the name of the NAS node.

Correct Answer: A

QUESTION 2

A NetApp filer has multiple volumes defined; some are exported with NFS and some are exported with CIFS. What should be considered when the backup will be done with the SnapDiff function of the incremental backup?

- A. SnapDiff works only with volumes of security style NTFS.
- B. The security style of the volume is independent from the kind of backup.
- C. Volumes with security style mixed can be backed up with Windows or AIX.
- D. Volumes with security style UNIX must be backed up with an AIX or Linux client.

Correct Answer: D

QUESTION 3

Which two network protocols are supported by the IBM Tivoli Storage Manager V6.3 client? (Choose two.)

- A. UDP
- B. HTML
- C. CHAP
- D. TCP/IP
- E. Named Pipes

Correct Answer: DE

QUESTION 4

To protect the NetApp or N-Series filer, the snapshot technology will be used. How must the filer be configured so that the SnapDiff function will work?

- A. The snapshot must be visible in CIFS or NFS.
- B. The snapshot must be accessible via CIFS or NFS.
- C. The .snapshot or -snapshot directory must be excluded.
- D. The local administrator must have read access to the snapshot

Correct Answer: B

QUESTION 5

A company writes a Service level Agreement (SLA) for their backup customers. This is a description of the default service level:

- All files backed up from the client node are governed by the "standard" management class.
- The current version, and up to two (2) previous versions, of a file will be kept in data storage when the file exists on the client node.
- If the file no longer exists on the client node, it and its two (2) previous versions remain in data storage.
- Deleted and previous versions will be retained for at least 30 days.

Which command conforms to the company's SLA?

- A. define copygroup standard standard standard verexist=30 verdel=3 retex=3 reto=30
- B. define copygroup standard standard standard verexist=30 verdel=30 retex=3 reto=3
- C. define copygroup standard standard standard verexist=2 verdel=3 retex=30 reto=30
- D. define copygroup standard standard standard verexist=3 verdel=3 retex=30 reto=30

Correct Answer: D
