QUESTION 1

Which statement is true regarding building a form?

- A. Sections can be added to the form without being defined in the business object (BO).
- B. Data fields can be added to the form without being defined in the BO.
- C. Locator fields can be added to the form without being defined in the BO.
- D. Smart sections can be added to the form without being defined in the BO.

Correct Answer: A

QUESTION 2

The Building form utilizes a Contact query section to show all contacts associated to the Building. A user says that he remembers adding multiple contacts to the Building record last week but now no contacts appear in the Contact query section. When troubleshooting the associations, which statement is true?

- A. The association filter used in the query must also have the association defined in the Report Manager.
- B. The association filter for the query in the query section is no longer filtering by the association string created when the form adds records.
- C. The association filter used in the query must match what is defined in the Data Modeler's Association List for the Building business object (BO).
- D. The association filter used in the query must match what is defined in the Association Manager between the Building and Contact BO.

Correct Answer: B

QUESTION 3

What is the required action to trigger an onChange event?

- A. A state transition action is clicked.
- B. The field value is changed by a workflow.
- C. A field value is changed by a Data Integrator.
- D. The user removing the focus from a field after changing its value

Correct Answer: D

QUESTION 4
