#### QUESTION 1

What describes a task within a modeled business process?

- A. The description of steps required to complete a unit of work
- B. Each task represents a work item performed by a system or human
- C. The transition that takes place for the business process to continue
- D. When a human completes a task it is marked complete allowing the process to proceed

Correct Answer: B

---

#### QUESTION 2

Which two statements define a service in SOA?

- A. It is a transaction that supports a business function.
- B. It is a standard way for messaging between service providers and consumers.
- C. It exposes business functionality with a well-defined interface that can be invoked.
- D. It is a language-specific operation that executes across an Enterprise Service Bus (ESB).
- E. It is a loosely-coupled component that can be choreographed to create a composite business function.

Correct Answer: CE

---

#### QUESTION 3

What describes the purpose of the Enterprise Service Bus (ESB) in an SOA?

- A. It provides separation of concerns so that each service can be managed separately.
- B. It provides a design that allows components to be changed with less impact to the consumer.
- C. It allows a service consumer to make a service request without knowing the details of the operation.
- D. It implements service functionality by integrating existing back end service functionality using routing and transformation logic.

Correct Answer: B

---

#### QUESTION 4

Which three statements describe services within a SOA?

- A. Services are written in Java or C#.
- B. Services are compatible across technologies.
- C. Services can change location without affecting clients.
- D. Services provide an interface according to a SOAP file.
- E. Services can be stopped without disruption to the consumer.
- F. Service implementations can be changed without changing the consumers.

Correct Answer: BCF

---

#### QUESTION 5

What most accurately describes a business process?

- A. The steps required to complete a unit of work in the optimal way
- B. An artifact used to capture the knowledge representing business requirements
- C. A flow of tasks that must be completed by systems or people in a certain order
- D. BPEL code that runs within a business process engine orchestrating the work of people and systems

Correct Answer: C
