QUESTION 1

Which three statements about powering down a Cisco UCS C-Series Rack-Mount Server to perform maintenance or replacement are true? (Choose three.)

A. Standby power mode: Power is supplied only to the service processor and the cooling fans, and it is safe to power off the server from this mode.

B. Power status LED. Green indicates that the server is in main power mode and can be safely powered off.

C. Graceful shutdown: Press and release the power button. The operating system performs a graceful shutdown, and the server goes to standby mode, which is indicated by an amber power status LED.

D. Disconnect the power cords from the power supplies in your server to completely power off the server.

E. Only an emergency shutdown can be performed using the power button on the server front panel.

F. The Cisco UCS C-Series Rack-Mount Server has only one power mode.

Correct Answer: ACD

QUESTION 2

Refer to the exhibit.

🗼 Cisco Unified Computing System Manager - F16100-1

Where is the best place to find the B200 BIOS version used in a specific Cisco UCS Manager version?

A. A - Installed Firmware

- B. B Packages
- C. C Images
- D. D Capability Catalog
- E. E Management Extension

Correct Answer: B

QUESTION 3

Which two statements about PCIe are true? (Choose two.)

A. The PCIe link is built around dedicated unidirectional couples of serial, point-to-point connections known as lanes.

B. You can install a PCI Express x8 adapter into an x4 slot.

C. The PCIe standard is a bus-based system in which all the devices share the same bidirectional, 32-bit or 64-bit, parallel signal path.

D. The PCIe 1.0 standard doubles the transfer rate compared to PCIe 2.0.

E. A link that is composed of four lanes is called an x4 link.

Correct Answer: AE
