QUESTION 1

Which of the following is NOT a required attribute for a user account?

- A. User Name
- B. Access Role
- C. First and Last Name
- D. Notification Subscriptions

Correct Answer: D

QUESTION 2

If a History Log field is deleted from an application, what will happen to the data stored within that History Log field?

- A. All data previously stored in that field is deleted.
- B. All data previously stored in that field is still maintained by the database.
- C. The user data stored within that field is saved, but all other data is deleted.
- D. Nothing; it is not possible to delete a History Log field once it has been populated within a single record.

Correct Answer: A

QUESTION 3

If a group is associated with an access role and the group contains sub-groups, how will the associated access role affect the sub-groups?

- A. The sub-groups will be inactivated.
- B. The sub-groups will be removed from the group.
- C. The sub-groups will be associated with the access role.
- D. The sub-groups will not be associated with the access role.

Correct Answer: D

QUESTION 4

When building an advanced search, if an end user adds a filter on a Color field for the value "Blue" and uses the "Contains" operator, which of the following records would be returned?

- A. A record with the value "Blue"
- B. A record with the values "Blue" and "Yellow"
- C. A record with the values "Purple" and "Yellow"
- D. Both A and B

Correct Answer: D

QUESTION 5

If an application has 10 fields, and a data import file contains values for 12 fields, what will happen with the remaining 2 columns of data when a Data Import is performed?

- A. The data in the two extra fields are merged into a single field in Archer.
- B. The remaining two columns of data are ignored and not imported into Archer.
- C. New fields will automatically be created to accommodate the two remaining columns of data.
- D. The extra data will be imported into a text file that can later be attached to records in Archer.

Correct Answer: B
