QUESTION 1

You have just installed a G700 Gateway with LSP at a remote location. The G700 will be placed in Network Region 5, and register with an S8500 Media Server at the corporate headquarters. What should you do to configure the QoS settings for the G700 in Network Region 5?

- A. Log in to the S8500 and configure the network map
- B. Log in to the S8300 LSP and configure the Network Region Form
- C. Log in to the G700 and configure the Network Region for the remote site
- D. Log in to the S8500 and configure Network Region Form for the remote site

Correct Answer: D

QUESTION 2

Which is NOT a service performed by the SIP Enablement Services (SES) Server?

- A. Proxy Server
- B. Location Server
- C. Session Boarder Controller
- D. Registrar

Correct Answer: C

QUESTION 3

What are four best practices for delivering high quality audio? (Choose four.)

- A. Using 802.1p/Q within Ethernet LANs
- B. Using G.711 on LANs and G.729 on WANs
- C. Using Differentiated Services within routers
- D. Using VLANs to separate voice from data traffic
- E. Using silence suppression to conserve bandwidth

Correct Answer: ABCD

QUESTION 4

Several Avaya G700 Media Gateways controlled by an Avaya S8300 Media Server have been proposed to a multi-location customer. The customer has an existing WAN and has expressed concern about backup if the primary S8300 Media Server fails. Which is the best option to provide increased survivability?

- A. a separate WAN link to each site
- B. a dedicated survivable G350 LSP
- C. an LSP implemented on a remote location G700
- D. an LSP at the main location on the same G700 where the S8300 resides

Correct Answer: C

QUESTION 5

A system needs to be upgraded from a G3csi system Release 10.1 to the current release of Avaya Communication Manager which is running on an S8500 with a G650 Media Gateway. You are provided a list of the cards in the system that includes:

four TN464 DS1 packs eight TN2224 digital station packs two TN793 analog packs one TN742 analog pack

What must you do to ensure the design will be a supported system? (Choose two.)

- A. add a TN799 Control-LAN (CLAN) interface
- B. determine specific hardware release information
- C. ensure all Ethernet connections are Cat5e compliant
- D. replace circuit boards that are below minimum vintage

Correct Answer: BD
