QUESTION 1

Which of these strategies can be employed to test training effectiveness? (Choose THREE.)

- A. Create a survey for managers, to see if participants practice behaviors presented during training.
- B. Provide feedback forms for employees to rate instruction and training material, immediately after training has ended.
- C. Include auditors before and after the training. This checks to see if the number of security-related incidents is reduced, because of the training.
- D. Give incentives to employees who attend security-awareness training. Perform spot-checks, to see if incentives are displayed.
- E. Test employees on security concepts several months after training has ended.

Correct Answer: ACE

QUESTION 2

Which of these choices correctly describe denial-of-service (DoS) attacks? (Choose THREE.)

- A. DoS attacks do not require attackers to have any privileges on a target system.
- B. DoS attacks are nearly impossible to stop, once they begin.
- C. DoS attacks free the target system of excessive overhead.
- D. DoS ties up a system with so many requests, system resources are consumed, and performance degrades.
- E. DoS attacks cause the attacked system to accept legitimate access requests.

Correct Answer: ABD

QUESTION 3

You are a system administrator for a pool of Web servers. The vendor who sells your Web server posts a patch and sample exploit for a newly discovered vulnerability. You will take all of the actions listed below. Which of the following actions should you take first?

- A. Run the sample exploit against a test server.
- B. Run the sample exploit against a production server.
- C. Apply the patch to all production servers.
- D. Test the patch on a production server.
- E. Test the patch on a non-production server.

Correct Answer: A

QUESTION 4

When should procedures be evaluated?

- A. When new functional users join an organization
- B. On the anniversary of the procedures\ implementation
- C. Each time procedures are used
- D. Whenever business processes are modified
- E. When new exploits and attacks are discovered

Correct Answer: D

QUESTION 5

Which of the following is MOST likely to cause management to view a security-needs proposal as invalid?

- A. Real-world examples
- B. Exaggeration
- C. Ranked threats
- D. Quantified risks
- E. Temperate manner

Correct Answer: B
