QUESTION 1

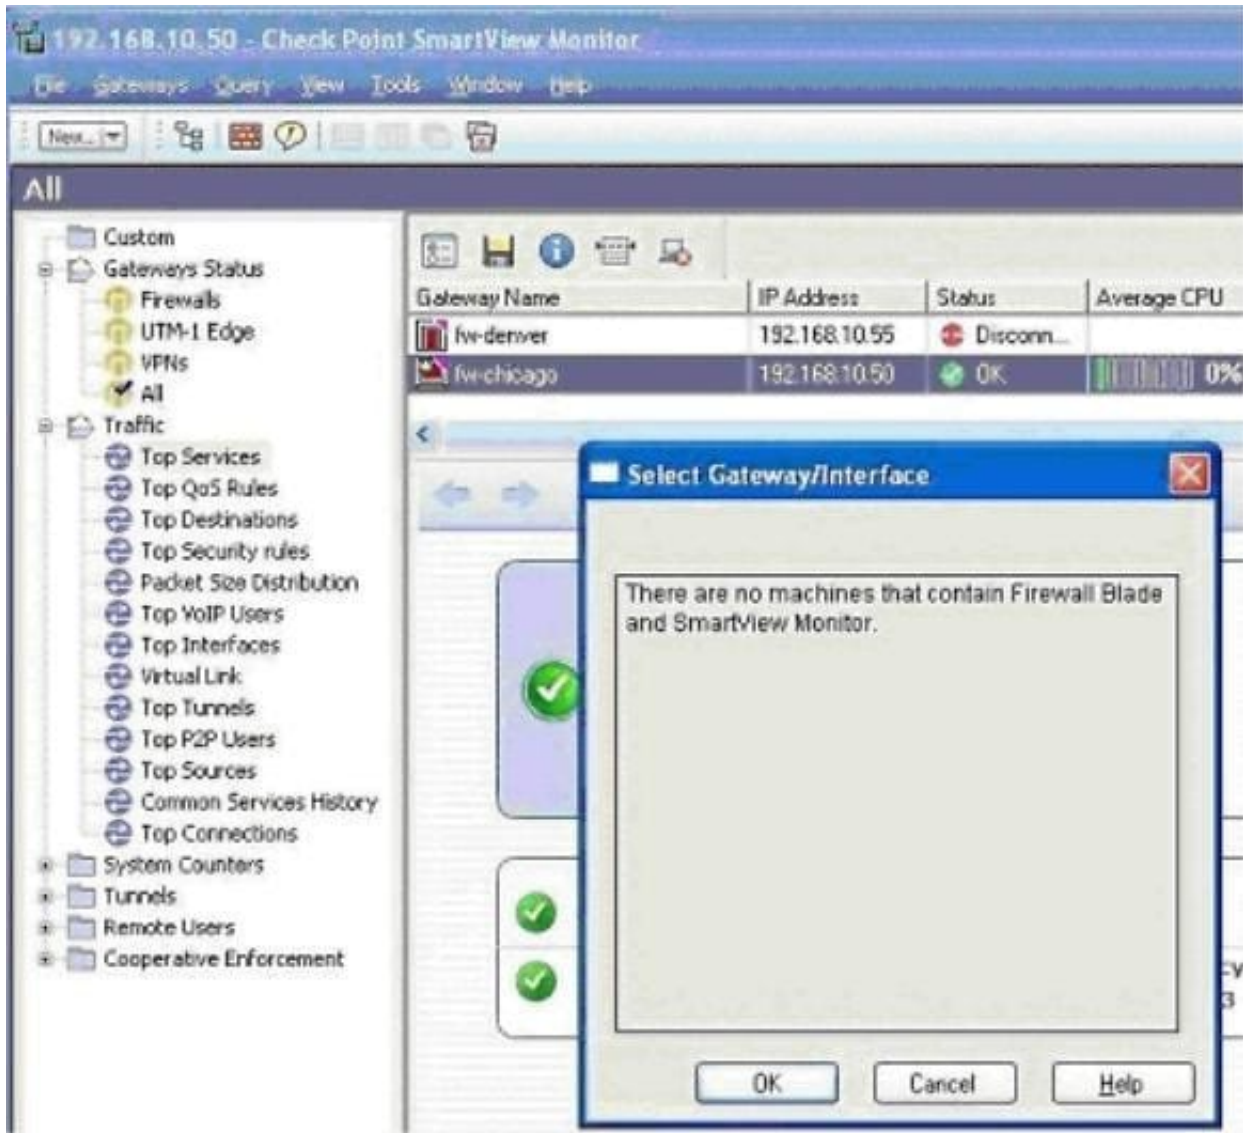

The Captive Portal tool:

- A. Allows access to users already identified
- B. Acquires identities from unidentified users
- C. Is deployed from the Identity Awareness page in the Global Properties settings
- D. Is only used for guest user authentication

Correct Answer: B

QUESTION 2

Cara wants to monitor the top services on her Security Gateway (fw-chicago), but she is getting an error message. Other Security Gateways are reporting the information except a new Security Gateway that was just recently deployed. Analyze the error message from the output below and determine what Cara can do to correct the problem.

- A. She should re-install the security policy on the security Gateway since it was using the default rule base
- B. She should create a firewall rule to allow the CPML traffic back to her smart console.
- C. She should let the monitoring run longer in order for it to collect sampled data
- D. She should edit the security Gateway object and enable the monitoring Software Blade.

Correct Answer: D

QUESTION 3

Which utility is necessary for reestablishing SIC?

- A. fwm sic_reset
- B. cpconfig

C. cplic

D. sysconfig

Correct Answer: B

QUESTION 4

Fill in the blank: When you want to create a VPN community where all participating gateways are able to connect to each other, you need to set up a _____ community.

A. Remote Access

B. Meshed

C. SSL VPN

D. Star

Correct Answer: B

QUESTION 5

Several Security Policies can be used for different installation targets. The firewall protecting Human Resources\\ servers should have a unique Policy Package. These rules may only be installed on this machine and not accidentally on the Internet firewall. How can this be configured?

A. A Rule Base is always installed on all possible targets. The rules to be installed on a firewall are defined by the selection in the row Install On of the Rule Base.

B. When selecting the correct firewall in each line of the row Install On of the Rule Base, only this firewall is shown in the list of possible installation targets after selecting Policy > Install.

C. In the SmartDashboard main menu go to Policy / Policy Installation / Targets and select the correct firewall to be put into the list via Specific Targets.

D. A Rule Base can always be installed on any Check Point firewall object It is necessary to select the appropriate target directly after selecting Policy > Install.

Correct Answer: C
