QUESTION 1

After implementing Static Address Translation to allow Internet traffic to an internal Web Server on your DMZ, you notice that any NATed connections to that machine are being dropped by anti-spoofing protections. Which of the following is the MOST LIKELY cause?

A. The Global Properties setting Translate destination on client side is checked. But the topology on the external interface is set to External. Change topology to Others +.

B. The Global Properties setting Translate destination on client side is unchecked. But the topology on the external interface is set to Others +. Change topology to External

C. The Global Properties setting Translate destination on client side is checked But the topology on the DMZ interface is set to Internal -Network defined by IP and Mask Uncheck the Global Properties setting Translate destination on client side

D. The Global Properties setting Translate destination on client side is unchecked. But the topology on the DMZ interface is set to Internal - Network defined by IP and Mask. Check the Global Properties setting Translate destination on client side.

Correct Answer: D

QUESTION 2

If you are experiencing LDAP issues, which of the following should you check?

A. Domain name resolution

B. Overlapping VPN Domains

C. Secure Internal Communications (SIC)

D. Connectivity between the R75 Gateway and LDAP server

Correct Answer: D

QUESTION 3

Which component functions as the Internal Certificate Authority for R75?

A. Security Gateway

B. Management Server

C. Policy Server

D. SmartLSM

Correct Answer: B

QUESTION 4

Suppose the Security Gateway hard drive fails and you are forced to rebuild it. You have a snapshot file stored to a TFTP server and backups of your Security Management Server. What is the correct procedure for rebuilding the Gateway quickly?

A. Run the revert command to restore the snapshot. Reinstall any necessary Check Point products. Establish SIC and install the Policy.

B. Run the revert command to restore the snapshot, establish SIC, and install the Policy.

C. Reinstall the base operating system (i.e., SecurePlatform). Configure the Gateway interface so that the Gateway can communicate with the TFTP server. Reinstall any necessary Check Point products and previously applied hotfixes. Revert to the stored snapshot image, and install the Policy.

D. Reinstall the base operating system (i.e., SecurePlatform). Configure the Gateway interface so that the Gateway can communicate with the TFTP server. Revert to the stored snapshot image, and install the Security Policy.

Correct Answer: D

QUESTION 5

Of the three mechanisms Check Point uses for controlling traffic, which enables firewalls to incorporate layer 4 awareness in packet inspection?

A. IPS

B. Packet filtering

C. Stateful Inspection

D. Application Intelligence

Correct Answer: C
