QUESTION 1

Several Security Policies can be used for different installation targets. The firewall protecting Human Resources\\ servers should have a unique Policy Package. These rules may only be installed on this machine and not accidentally on the Internet firewall. How can this be configured?

- A. When selecting the correct firewall in each line of the row Install On of the Rule Base, only this firewall is shown in the list of possible installation targets after selecting Policy > Install.
- B. A Rule Base can always be installed on any Check Point firewall object. It is necessary to select the appropriate target directly after selecting Policy > Install.
- C. In the SmartDashboard policy, select the correct firewall to be the Specific Target of the rule.
- D. A Rule Base is always installed on all possible targets. The rules to be installed on a firewall are defined by the selection in the row Install On of the Rule Base.
