Correct Answer: C

QUESTION 2

The security Gateway is installed on GAIa R80 The default port for the WEB User Interface is _____ .

- A. TCP 18211
- B. TCP 257
- C. TCP 4433
- D. TCP 443

Correct Answer: D

QUESTION 3

Access roles allow the firewall administrator to configure network access according to: A. a combination of computer groups and network

- B. users and user groups
- C. all of above
- D. remote access clients

Correct Answer: C

To create an access role:

1.
Select Users and Administrators in the Objects Tree.
- 2.

Right-click Access Roles > New Access Role.

The Access Role window opens.

3.

Enter a Name and Comment (optional) for the access role.

4.

In the Networks tab, select one of these:

Any network

Specific networks - Click the plus sign and select a network.

Your selection is shown in the Networks node in the Role Preview pane.

5.

In the Users tab, select one of these:

Any user

All identified users - Includes users identified by a supported authentication method (internal users, AD users or LDAP users).

Specific users - Click the plus sign.

A window opens. You can search for Active Directory entries or select them from the list.

6.

In the Machines tab, select one of these:

Any machine

All identified machines - Includes machines identified by a supported authentication method (AD).

Specific machines - Click the plus sign.

You can search for AD entries or select them from the list.

7.

Optional: For computers that use Full Identity Agents, from the Machines tab select Enforce IP spoofing protection.

8.

Click OK.

The access role is added to the Users and Administrators tree.
