QUESTION 1

When Load Sharing Multicast mode is defined in a ClusterXL cluster object, how are packets being handled by cluster members?

- A. All members receive all packets. The Security Management Server decides which member will process the packets. Other members delete the packets from memory.
- B. All cluster members process all packets and members synchronize with each other.
- C. All members receive all packets. All members run an algorithm which determines which member processes packets further and which members delete the packet from memory.
- D. Only one member at a time is active. The active cluster member processes all packets.

Correct Answer: C

QUESTION 2

Consider the following actions that VPN-1 NGX can take when it control packets. The Policy Package has been configured for Traditional Mode VPN. Identify the options that includes the available actions. Select four.

- A. Allow
- B. Reject
- C. Client auth
- D. Decrypt
- E. Accept
- F. Drop
- G. Encrypt
- H. Hold
- I. Proxy

Correct Answer: BEFG

QUESTION 3

ABC.com has two sites using certificates-based VPN issued by the ICA. The two sites, Tokyo and Paris, are configured using a simplified VPN policy. You are trying to integrate a new office opening in New Delhi. You must enable all three

sites to connect via the VPN to each other. Three Security Gateways are managed by the same SmartCenter Server behind the Paris Security Gateway.

After creating the Dubai Gateway object with the proper VPN domain, what must you do?

Select and Place:

Steps Select from here	Steps place here
Add the Dubai Gateway object into the mesh VPN Community shared by Paris and Tokyo	Place first step here
Reinstall the Security Policy on all three Gateways	Place first step here
Configure "Traditional mode VPN configuration" option in the Dubai Gateway object's VPN screen. Ensure that the "Support Authentication Methods: Public key Signatures" is checked	Place third step, if any, here
Verify the Rules Bases which will be installed on all three gateways allows the desired source and destination VPN traffic	Place fourth step, if any, here
Manually generate an ICA Certificate on the VPN tab of the of the Dubai Gateway object by clicking the Add ... button.	Place 5th step, if any, here

Correct Answer:

Steps Select from here	Steps place here
	Verify the Rules Bases which will be installed on all three gateways allows the desired source and destination VPN traffic
	Add the Dubai Gateway object into the mesh VPN Community shared by Paris and Tokyo
Configure "Traditional mode VPN configuration" option in the Dubai Gateway object's VPN screen. Ensure that the "Support Authentication Methods: Public key Signatures" is checked	Reinstall the Security Policy on all three Gateways
	Place fourth step, if any, here
Manually generate an ICA Certificate on the VPN tab of the of the Dubai Gateway object by clicking the Add ... button.	Place 5th step, if any, here

QUESTION 4

How is change approved for implementation in SmartWorkflow?

A. The change is submitted for approval and is automatically installed by the approver once Approve is clicked

- B. The change is submitted for approval and is automatically installed by the original submitter the next time he logs in after approval of the 3nge
- C. The change is submitted for approval and is manually installed by the original submitter the next time he logs in after approval of the change.
- D. The change is submitted for approval and is manually installed by the approver once Approve is clicked

Correct Answer: C

QUESTION 5

You are preparing computers for a new ClusterXL deployment. For your cluster, you plan to use three machines with the following configurations:

Cluster Member 1: OS - GAIa; NICs - QuadCard; Memory - 1 GB; Security Gateway - version: R71 and primary Security Management Server installed, version: R77

Cluster Member 2: OS - GAIa; NICs - 4 Intel 3Com; Memory - 1 GB; Security Gateway only, version: R77

Cluster Member 3: OS - GAIa; NICs - 4 other manufacturers; Memory - 512 MB; Security Gateway only, version: R77

Are these machines correctly configured for a ClusterXL deployment?

- A. No, the Security Gateway cannot be installed on the Security Management Server.
- B. No, the Security Management Server is not running the same operating system as the cluster members.
- C. Yes, these machines are configured correctly for a ClusterXL deployment.
- D. No, Cluster Member 3 does not have the required memory.

Correct Answer: A
