---

## QUESTION 3

Packet acceleration (SecureXL) identifies connections by several attributes. Which of the attributes is NOT used for identifying connection?

- A. Source Address
- B. Destination Address
- C. TCP Acknowledgement Number
- D. Source Port

Correct Answer: C

Connections are identified by the 5 tuple attributes: source address, destination address, source port, destination port, protocol. When the packets in a connection match all the 5 tuple attributes, the traffic flow can be processed on the accelerated path.

---

## QUESTION 4

Capsule Connect and Capsule Workspace both offer secured connection for remote users who are using their mobile devices. However, there are differences between the two.

Which of the following statements correctly identify each product's capabilities?

- A. Workspace supports ios operating system, Android, and WP8, whereas Connect supports ios operating system and Android only
- B. For compliance/host checking, Workspace offers the MDM cooperative enforcement, whereas Connect offers both jailbreak/root detection and MDM cooperative enforcement.
- C. For credential protection, Connect uses One-time Password login support and has no SSO support, whereas Workspace offers both One-Time Password login support as well as SSO for specific applications.
- D. Workspace can support any application, whereas Connect has a limited number of application types which it will support.

Correct Answer: C

---
