Correct Answer: B

QUESTION 4

Which of the following is the most critical step in a SmartCenter Server NGX R65 backup strategy?

- A. Perform a full system tape backup of both the SmartCenter and Security Gateway machines.

- B. Run the cpstop command prior to running the upgrade_export command
- C. Using the upgradeimport command, attempt to restore the SmartCenter Server to a non- production system
- D. Move the *.tgz upgrade_export file to an off site location via ftp.

Correct Answer: C

QUESTION 5

Your VPN-1 NGX R65 primary SmartCenter Server is installed on SecurePlatform. You plan to schedule the SmartCenter Server to run fw logswitch automatically every 48 hours.

How do you create this schedule?

- A. Create a time object, and add 48 hours as the interval. Select that time object's Global Properties > Logs and Masters window, to schedule a logswitch.
- B. Create a time object, and add 48 hours as the interval. Open the Security Gateway object's Logs and Masters window, enable "Schedule log switch", and select the time object.
- C. Create a time object, and add 48 hours as the interval. Open the primary SmartCenter Server object's Logs and Masters window, enable "Schedule log switch", and select the Time object.
- D. On a SecurePlatform SmartCenter Server, this can only be accomplished by configuring the fw logswitch command via the cron utility.

Correct Answer: C
