QUESTION 1

Anytime a client initiates a connection to a server, the firewall kernel signals the FWD process using a trap. FWD spawns the _____ child service, which runs the security server.

- A. FWD
- B. FWSD
- C. In.httpd
- D. FWSSD

Correct Answer: D

QUESTION 2

John Adams is an HR partner in the ACME organization. ACME IT wants to limit access to HR servers to a set of designated IP addresses to minimize malware infection and unauthorized access risks. Thus, the gateway policy permits access only from John's desktop which is assigned a static IP address 10.0.0.19.

He has received a new laptop and wants to access the HR Web Server from anywhere in the organization. The IT department gave the laptop a static IP address, but that limits him to operating it only from his desk. The current Rule Base contains a rule that lets John Adams access the HR Web Server from his laptop with a static IP (10.0.0.19).

He wants to move around the organization and continue to have access to the HR Web Server. To make this scenario work, the IT administrator:

- 1) Enables Identity Awareness on a gateway, selects AD Query as one of the Identity Sources, and installs the policy.
- 2) Adds an access role object to the Firewall Rule Base that lets John Adams access the HR Web Server from any machine and from any location and installs policy.

John plugged in his laptop to the network on a different network segment and was not able to connect to the HR Web server. What is the next BEST troubleshooting step?

- A. Investigate this as a network connectivity issue
- B. Install the Identity Awareness Agent
- C. Set static IP to DHCP
- D. After enabling Identity Awareness, reboot the gateway

Correct Answer: C

QUESTION 3

You are the Security Administrator for MegaCorp. A Check Point firewall is installed and in use on a platform using GAIa. You have trouble configuring the speed and duplex settings of your Ethernet interfaces. Which of the following commands can be used in CLISH to configure the speed and duplex settings of an Ethernet interface and will survive a

reboot? Give the BEST answer.

- A. ethtool
- B. set interface
- C. mii_tool
- D. ifconfig -a

Correct Answer: B

QUESTION 4

The process _____ is responsible for GUI Client communication with the Smart Center.

- A. FWD
- B. FWM
- C. CPD
- D. CPLMD

Correct Answer: B

QUESTION 5

All R77 Security Servers can perform authentication with the exception of one. Which of the Security Servers can NOT perform authentication?

- A. FTP
- B. SMTP
- C. HTTP
- D. RLOGIN

Correct Answer: B
