QUESTION 3

You are about to integrate RSA SecurID users into the Check Point infrastructure. What kind of users are to be defined via SmartDashboard?

- A. A group with generic user
- B. All users
- C. LDAP Account Unit Group
- D. Internal user Group

Correct Answer: A

QUESTION 4

Assume you are a Security Administrator for ABCTech. You have allowed authenticated access to users from Mktng_net to Finance_net. But in the user's properties, connections are only permitted within Mktng_net. What is the BEST way to resolve this conflict?

- A. Select Ignore Database in the Action Properties window.

- B. Permit access to Finance_net.
- C. Select Intersect with user database in the Action Properties window.
- D. Select Intersect with user database or Ignore Database in the Action Properties window.

Correct Answer: D

QUESTION 5

Your R80 primary Security Management Server is installed on GAIa;

You plan to schedule the Security Management Server to run fw logswitch automatically every 48 hours.

How do you create this schedule?

- A. On a GAIa Security Management Server, this can only be accomplished by configuring the command fw logswitch via the cron utility.
- B. Create a time object, and add 48 hours as the interval. Open the primary Security Management Server object's Logs and Masters window, enable Schedule log switch, and select the Time object.
- C. Create a time object, and add 48 hours as the interval. Open the Security Gateway object's Logs and Masters window, enable Schedule log switch, and select the Time object.
- D. Create a time object, and add 48 hours as the interval. Select that time object's Global Properties > Logs and Masters window, to schedule a logswitch.

Correct Answer: B
