QUESTION 1

You have determined that an attack is currently underway on your database server. An attacker is currently logged in, modifying data. You want to preserve logs, caching and other data on this affected server.

Which of the following actions will best allow you to stop the attack and still preserve data?

A. Pull the server network cable

B. Shut down the server

C. Back up the system logs

D. Force an instant password reset

Correct Answer: A

QUESTION 2

An application is creating hashes of each file on an attached storage device. Which of the following will typically occur during this process?

A. An increase in the amount of time it takes for the system to respond to requests

B. Reduced risk of an attack

C. Increased risk of an attack

D. A reduction in the amount of time it takes for the system to respond to requests

Correct Answer: A

QUESTION 3

Consider the following image: From the information in this image, what type of attack is occurring?

```
                        james@jamey: ~
File  Edit  View  Terminal  Tabs  Help
james@jamey:~$ sudo john /etc/shadow
[sudo] password for james:
Created directory: /root/.john
Loaded 1 password hash (FreeBSD MD5 [32/32])
