QUESTION 1

Scenario: An organization has two XenDesktop sites. Each site has its own Delivery Controller. Users logging on to the Receiver for Web site report that applications and desktops from both sites are intermittently unavailable. Which action could a Citrix Administrator take to investigate this issue?

A. Add each Delivery Controller to the server list.

B. Use different XML ports for each Delivery Controller.

C. Create a separate StoreFront store for each XenDesktop site.

D. Add each Delivery Controller as unique delivery controller types in the Receiver for Web site.

Correct Answer: D

QUESTION 2

Scenario: A Citrix Administrator replaces the production StoreFront server with a new StoreFront server. Users access their resources from StoreFront through NetScaler.

Which NetScaler policy must the administrator modify in order to allow users to continue to access resources securely from external locations?

A. Traffic

B. Session

C. Authorization

D. Authentication

Correct Answer: B

QUESTION 3

Scenario: To ensure security, users who connect to the network from a remote location must be unable to map their client drives and printers. A Citrix Administrator creates a policy that blocks client drives and printers and configures a filter for NetScaler.

Which additional step should the administrator take to meet the requirements of the scenario?

A. Configure the user filter on the policy.

B. Add an access control filter to the policy.

C. Ensure that the client is running the latest version of Receiver.

D. Set the priority of the policy so that it is given more preference.

Correct Answer: B

QUESTION 4

Scenario: A company implements XenDesktop. Windows XP users are unable to launch their Windows 8 virtual desktops. They receive the following error:

Error: Please contact your help desk with the following information: Cannot validate SSL certificate.

What is a possible cause of this error?

A. Citrix Receiver needs to be updated.

B. The SSL certificate on the NetScaler has expired.

C. The server certificate is NOT installed on the computer.

D. Citrix Receiver is unable to verify the server certificate revocation.

Correct Answer: D

QUESTION 5

Which action should a Citrix Administrator take when using Provisioning Services to provision additional Windows Server 2012 server OS machines in a machine catalog?

A. Create a vDisk for the OS.

B. Add the OS to the vDisk store.

C. Create a site for virtual machines.

D. Add the virtual machines to the device collection.

Correct Answer: D
