QUESTION 1

Various users report that while accessing the Citrix NetScaler Gateway virtual server they get an error message that the public SSL certificate is NOT trusted. Which three steps should a Citrix Administrator take on the NetScaler to resolve this issue? (Choose three.)

- A. Import the root certificate.
- B. Import the intermediate certificate.
- C. Download the root certificate from the vendor.
- D. Link the root certificate to the intermediate certificate.
- E. Download the intermediate certificate from the vendor.
- F. Link the intermediate certificate to the existing server certificate.

Correct Answer: BEF

QUESTION 2

Scenario: An administrator has configured three Web Interface sites. The sites are configured to fail over to another site if a site failure occurs. After a failure occurs, the failing site is NOT available for connections for one hour. The administrator wants to lessen the amount of time that the failing site is unavailable. What can an administrator do to lessen the amount of time the site is unavailable?

- A. Adjust the '\\socket timeout\\' setting
- B. Adjust the '\\bypass any failed server\\' setting
- C. Configure the '\\disconnected session timer\\' setting
- D. Configure Health Monitoring and Recovery to restart the server upon failure

Correct Answer: B

QUESTION 3

Scenario: A Citrix Administrator created a content switching virtual server. The administrator is unable to bind the load balancing virtual server to the content switching virtual server.

Which protocol is being used on the load balancing virtual server that is causing this issue?

- A. SSL
- B. TCP
- C. UDP

D. SSL Bridge

Correct Answer: D

QUESTION 4

Scenario: Two NetScaler Gateway virtual servers are configured on a NetScaler appliance. Each NetScaler Gateway virtual server is used to enable secure remote access to dedicated XenDesktop sites for separate divisions: Division A: NetScaler Gateway: NG-A XenDesktop Controller: DDC-A Division B: NetScaler Gateway: NG-B XenDesktop Controller: DDC-B Each XenDesktop site is placed in its own Active Directory. Firewalls prevent any communication between the divisions.

An administrator should configure the Secure Ticket Authority on the NetScaler for Division B, without causing any configuration issues for NG-A, by binding . (Choose the correct option to complete the sentence.)

- A. DDC-B to NG-A
- B. DDC-B to NG-B
- C. DDC-B to NG-A and DDC-A
- D. DDC-A and DDC-B to a load-balancing virtual server

Correct Answer: B

QUESTION 5

What should a Citrix Administrator configure in a session profile so that users are able to use WorxWeb on their mobile devices?

- A. SSL vPN
- B. ICA Proxy
- C. Secure Browse
- D. Clientless Access

Correct Answer: C
