QUESTION 1

Scenario: After using evaluation licensing to explore XenDesktop, a Citrix Engineer installs valid Enterprise licenses on the Citrix License Server. The engineer confirms that the licenses show correctly in the license console. A few weeks later, users in the environment report that they are receiving an error message when logging into Desktop OS machines that states the evaluation license is about to expire.

What should the engineer do to correct this issue?

- A. Select the correct product edition in Citrix Studio.
- B. Delete the evaluation license and restart the License service.
- C. Reallocate the production license with the FQDN of the License Server.
- D. Reinstall the production licenses on the License Server and restart the License service.

Correct Answer: A Section: (none)

QUESTION 2

Which statement accurately describes the purpose of StoreFront beacons?

- A. Determine which servers are up in a highly available StoreFront server group.
- B. Sent to XenApp and XenDesktop Delivery Controllers to determine which resources a user has access to.
- C. Allow StoreFront to automatically update receiver clients when a beacon from an old receiver client is received.
- D. Determine whether a user is connected to a local network or connecting from the Internet so that the appropriate connection details can be passed to Citrix Receiver.

Correct Answer: D Section: (none)

QUESTION 3
