**QUESTION 4**

Scenario: A Citrix Engineer recently implemented a Provisioning Services environment, which still has all the default configurations and uses a standalone SQL Server 2008 R2 machine to host the Farm database. No shared storage is available.

Management would like to expand the environment so that it can be used to support several critical use cases within the organization. The following requirements must be met regards to the Farm database:

- The solution must ensure that all Farm functionality is retained if the primary database server becomes unresponsive.
- The solution must NOT require manual administrator intervention during the failure.
- The solution must NOT require any upgrades to existing FARM components.

Which configuration will meet all the requirements of this scenario?

- A. SQL Always On Availability Group
- B. Offline database support
- C. SQL Mirroring
- D. SQL Clustering

Correct Answer: B

---

**QUESTION 5**

Ensure HDX sessions are launched in the zone that is closest to user data, if possible.

If the preferred zone for the user is unavailable, launch the session in an alternative zone.

Which zone preference setting can the Citrix Engineer use to accomplish these objectives?

- A. App Home
- B. User Home
- C. User Location
- D. Mandatory User Home Zone

Correct Answer: B
