QUESTION 1

A Citrix XenApp Administrator needs to create a load balancing policy and apply it to several XenApp servers.

Which two methods would require the administrator to use the least amount of effort to meet the requirements? (Choose two.)

- A. Create a worker group and add targeted servers to it.
- B. Create a load balancing policy and assign it to targeted servers.
- C. Create a load balancing policy and assign it to the worker group.
- D. Create a worker group and attach the load balancing policy to XenApp servers.

Correct Answer: AC

QUESTION 2

Scenario: A Citrix Engineer added a second Provisioning Services server to an existing Provisioning Services Site for high availability. The engineer copied the virtual hard drive (VHD) files to the store on the new Provisioning Services server.

After doing that, the second server did NOT show the disk as `available\\` under replication status.

Which is vDisk replication status failing for the new server?

- A. The vDisk is still in Standard mode.
- B. The disk has to be replicated through Distributed File System Replication (DFSR).
- C. The manifest file has NOT been created.
- D. The .PVP file has NOT been copied.

Correct Answer: D

QUESTION 3

Scenario: A Citrix Engineer recently implemented a Provisioning Services pilot environment, which still has all the default configurations and uses a standalone SQL Server Express machine to host the Farm database. Management would like the engineer to expand the environmental so that it can be used to support several critical use cases within the organization. The farm database must meet these

requirements:

- The solution must ensure that production users are NOT impacted in the event of a database outage.
- The solution must NOT require manual administrator intervention.
- No additional funding is available to accomplish this objective.

Which configuration will meet all the requirements of the scenario?

- A. SQL AlwaysOn Availability Group
- B. Offline database support
- C. SQL Mirroring
- D. SQL Clustering

Correct Answer: B

QUESTION 4

When creating layers, an image template can be used to _____. (Choose the correct option to complete the sentence.)

- A. Build an Application or Platform Layer
- B. Create an image of an App Layer for elastic distribution
- C. Create an OS Layer version
- D. Publish Layered Images

Correct Answer: D
