QUESTION 1

Scenario: A XenMobile Server has been implemented with Public Key Infrastructure (PKI) for security. Management has asked for the XenMobile Server to enumerate XenApp and XenDesktop resources. After the Citrix Engineer has configured the XenMobile Server to communicate with StoreFront, the users still CANNOT see Windows applications and desktops.

Which two additional steps must the engineer take to resolve the enumeration failure? (Choose two.)

- A. List the XML Broker as a Secure Ticket Authority (STA) in StoreFront.
- B. Modify the Global Catalog Context in the LDAP profile on the XenMobile Server.
- C. Set up the NetScaler Gateway Logon Type to Certificate and Domain within the XenMobile Server.
- D. Bind an additional authentication policy for LDAP to the NetScaler Gateway virtual server.
- E. Configure the Network Access Control settings in the XenMobile Server.

Correct Answer: CD

QUESTION 2

What happens if a Citrix Engineer allows an Apple Developer certificate to expire?

- A. iOS MDX applications fail to launch.
- B. Associated Apple Unique Device Identifiers (UDIDs) must be re-entered within the Apple Developer Program portal.
- C. iOS device enrollment fails to occur.
- D. Apple Push Notification service (APNs) notifications fail to occur.

Correct Answer: A

QUESTION 3

Scenario: A Citrix Engineer has already backed up the XenMobile configuration database. The following is a list, in no particular order, of some of the remaining steps that the engineer must complete to apply a patch to a multi-node, clustered XenMobile Server deployment:

1.
Shut down the updated node.
2.
Repeat the above steps for each node in the cluster until all nodes have been upgraded.
- 3.

Fail over to secondary node.

4.

Update the running node and confirm that the service is running.

5.

Start the next node in the cluster.

6.

Shut down all but one node.

7.

Verify that all nodes are running in the cluster.

8.

Update all nodes at the same time.

9.

Restore the XenMobile configuration database.

Which six steps must the engineer take, and in which order do they need to be completed, to apply a patch to a multi-node, clustered XenMobile Server deployment?

A. 6, 4, 1, 5, 2, 7

B. 6, 8, 7, 1, 3, 9

C. 7, 8, 6, 3, 2, 9

D. 7, 6, 3, 4, 9, 2

Correct Answer: A

QUESTION 4

Scenario: A Citrix Engineer needs to publish a custom mobile application for iOS devices from the XenMobile environment.

Security requirements for the application are as follows:

-Clipboard must be disabled.

-

Application cannot be installed on jailbroken devices.

Which action must the engineer take to meet the security requirements stated in the scenario?

A.

Wrap the .ipa file using the MDX Toolkit for XenMobile and configure the MDX policies.

B.

Upload the .ipa file to the XenMobile Device Manager and create a deployment package to install the application on the user device during device enrollment.

C.

Upload the .ipa file directly to App Controller and require enrollment to the XenMobile Device Manager before users can register with the App Controller.

D.

Publish the application for employees using the Apple App Store and require that users download the application from the Apple App Store instead of the App Controller.

Correct Answer: A

QUESTION 5

Which three MDX policies would require a re-installation of the applications in order to be refreshed on the device when attempting to troubleshoot a policy-related issue? (Choose three.)

A. Security Group

B. Network access

C. Enable encryption

D. Allowed URLs

E. Export Contacts

F. WorxMail Exchange Server FQDN

Correct Answer: ACF
