QUESTION 1

Which two manually performed tasks can be streamlined by implementing a Citrix environment? (Choose two.)

- A. Database backup
- B. Application patching
- C. Security assessment
- D. Certificate management
- E. Operating system installation

Correct Answer: BE

QUESTION 2

Which three user groups require remote access? (Choose three.)

- A. IT
- B. Call center
- C. Human Resources
- D. Emergency Response Team
- E. Nurses, Imaging, and Radiology

Correct Answer: ACD

QUESTION 3

Why should CPU consumption be used to identify bottlenecks?

- A. High CPU utilization of the Delivery Controller can indicate a high volume of user logons, indicating that the server may NOT have sufficient resources to handle the load.
- B. High CPU utilization of the Delivery Controller can indicate that the target device will encounter delays when mounting new vDisks.
- C. High CPU utilization of the Delivery Controller can indicate that a high number of processor-intensive applications are being utilized by the virtual desktop users.
- D. High CPU utilization of the Delivery Controller can indicate the presence of a virus or malware.

Correct Answer: A

QUESTION 4

Scenario:

CGE needs to define its management process for desktop image releases. Some groups need a process for version control that includes thorough testing prior to production. Why does using Windows Deployment Services and installing Windows applications into an image help manage the image versioning process?

- A. It reduces application deployment time.
- B. It standardizes the application deployment process.
- C. It facilitates the use of App-V packages.
- D. It automatically deploys the latest drivers and patches.

Correct Answer: B

QUESTION 5

Scenario:

CGE decided to virtualize its infrastructure workloads and provide a virtual solution to all end users. The infrastructure workloads include Delivery Controllers, StoreFront servers, License Servers, and Microsoft SQL Servers for databases.

What is the benefit of using Streamed VHD?

- A. It leverages local client hardware.
- B. It provides the greatest level of end-user personalization.
- C. It supports a variety of hardware configurations from a single image.
- D. It allows remote access to applications.

Correct Answer: C
