QUESTION 1

Scenario:

CGE's security officer states that, for compliance reasons, all network traffic between Delivery Controllers, StoreFront servers, and NetScalers must be encrypted.

Why does using L2TP meet CGE's compliance requirements?

- A. It encrypts internal ICA traffic.
- B. It encrypts ICA traffic from remote end users.
- C. It enables the SSL Relay service.
- D. It complies with industry-standard SSL encryption requirements.

Correct Answer: A

QUESTION 2

Why should the each component be located at each datacenter?

- A. This design allows for site failover and increases security for remote access
- B. This design reduces component design complexity
- C. This design simplifies administration of components
- D. This design prevents user experience from being affected in the event of a site outage.

Correct Answer: A

QUESTION 3

Why does using SQL Reporting Services help the company comply with its security policy?

- A. Because it is a centralized, industry-standard log that is easily queried
- B. Because it password-protects the audit logs for added security
- C. Because it uses a standard TCP port
- D. Because it collects logs from multiple devices

Correct Answer: D

QUESTION 4

Scenario:

CGE acquires a small energy company that is running MGMT, a proprietary 16-bit application. A Citrix Architect is tasked with deploying this application to the Executives/Management end-user group. The CIO mandates that a FlexCast model must be chosen that resembles this end-user group's existing delivery strategy.

It is important that a single-image deployment is utilized and that management effort is kept to a minimum for the update process. The availability of a fast rollback plan must also be available after upgrades, since it can often result in system instability.

How should the architect deploy MGMT using Remote PC?

- A. On Windows 7 with Machine Creation Services
- B. On Windows 8 with Machine Creation Services
- C. On Windows 7 with Provisioning Services
- D. On Windows 8 with Provisioning Services

Correct Answer: C

QUESTION 5

Scenario:

CGE needs to define its management process for desktop image releases. Some groups need a process for version control that includes thorough testing prior to production. How should the architect use Windows Deployment Services to facilitate image management?

- A. By deploying a standard base image to virtual desktops
- B. By deploying a base image from an XVA file
- C. By centralizing the volume-activation process
- D. By installing Windows applications into an image

Correct Answer: A
