QUESTION 1

Why is configuring an iSCSI LUN on a NAS the best design choice for vDisk storage?

- A. It is the least expensive solution.
- B. It is a highly scalable and resilient solution.
- C. It creates the least amount of administrative overhead.
- D. It reduces the system footprint.

Correct Answer: D

QUESTION 2

Scenario:

CGE decided to virtualize its infrastructure workloads and provide a virtual solution to all end users. The infrastructure workloads include Delivery Controllers, StoreFront servers, License Servers, and Microsoft SQL Servers for databases.

What are the benefits of using Hosted VDI by using cloned VM templates?

- A. It provides the highest end-user density at the lowest cost.
- B. It offers the greatest level of end-user personalization and control.
- C. It offers the lowest storage performance requirement and the highest end-user density.
- D. It facilitates rapid provisioning.

Correct Answer: D

QUESTION 3

What should a Citrix Architect identify as a potential security risk that should be resolved in the next design, based on the current provision for external access?

- A. Web Interface is used
- B. Online Plug-in 12.1 is used
- C. NetScaler Gateway is used to load balance StoreFront
- D. Single-factor authentication is used for external access

Correct Answer: C

QUESTION 4

Which action would improve the end-user experience for Technicians and Engineers?

- A. Apply a Citrix policy to enable lossless graphics
- B. Apply a Citrix policy to disable Queuing and Tossing
- C. Apply a Citrix policy to enable Desktop Composition Redirection
- D. Apply a Citrix policy to limit graphics quality based on available bandwidth

Correct Answer: D

QUESTION 5

Scenario:

CGE needs to define its management process for desktop image releases. Some groups need a process for version control that includes thorough testing prior to production. Why does using Provisioning Services and leveraging snapshots help manage the image versioning process?

- A. It enables rollbacks.
- B. It manages version control.
- C. It leverages storage array features to offload host processing.
- D. It automatically deploys the latest drivers and patches.

Correct Answer: D
