QUESTION 1

Scenario: A Citrix Architect needs to design a new XenApp and XenDesktop environment.

The architect has identified the Resource Layer requirements shown in the Exhibit.

Click the Exhibit button to view the requirements.

User Group	Do user settings need to persist?	Assigned FlexCast model	Access required to profile folders?	Additional Requirements
Accountants	Yes	Published apps	Yes, the following folders should be available: <ul style="list-style-type: none"> • Contacts • Desktop • Favorites • My Documents 	Needs synchronization of a specific application log file within the AppData folder
Executives	Yes	Remote PC Access	Yes, the following folders should be available: <ul style="list-style-type: none"> • Contacts • Desktop • Downloads • Favorites • My Documents 	Needs ability to use resource locally while offline
Graphic Designers	Yes	Hosted VDI (Static / persistent, uses vGPU)	No	No
Customer Service	No	Published Desktop (Server OS)	No	No

Additionally, management at the organization has identified the following general Resource Layer requirements:

The profile solution should minimize logon and logoff times as much as possible. The time required to configure and maintain the solution should be minimized. User groups do NOT need to use the same profile type.

Which profile type should the architect use for the Customer Service group?

- A. Microsoft roaming
- B. Mandatory
- C. Local
- D. Citrix Profile Management

Correct Answer: C

QUESTION 2

A Citrix Architect needs to conduct a capabilities assessment for an organization that wants to design and build a new XenApp and XenDesktop environment.

Which three capabilities will directly influence whether the existing Citrix administrative team will have the capacity to support the new environment? (Choose three.)

- A. Certificate Authority configuration
- B. Current backup solutions
- C. Users and applications
- D. Image management processes
- E. Training and certifications of support staff and users
- F. DNS infrastructure
- G. Image management processes

Correct Answer: CDF

QUESTION 3

Scenario: A Citrix Architect needs to design a new XenApp and XenDesktop environment.

The architect has determined the user groups and FlexCast model listed in the Exhibit during the high-level design. Click the Exhibit button to view the user group and FlexCast model details.

User Groups	Endpoint	Network	Virtual Desktop	Desktop	Comments
Accounts	Corporate-Owned	LAN	Pooled VDI	Windows 7	Office Applications
Executives	Corporate-owned	LAN	Hosted Shared App	Windows 2016	None
Graphic Designers	Mac BYOD	LAN	Hosted Shared Desktop	Windows 2008R2	Multimedia with High Frame Rate
Customer Service	Corporate-Owned	WAN	Personal Hosted Desktop	Windows 10	None
Field Engineers	Mobile broadband tablet	Satellite link	Hosted Shared Desktop	Windows 2008R2	3D CAD

Which graphics protocol should the architect select for the highlighted group in the Exhibit?

- A. Thinwire (Legacy)
- B. Framehawk
- C. Thinwire+
- D. H.264

Correct Answer: C

QUESTION 4

Scenario: A Citrix Architect needs to design a new XenApp and XenDesktop environment. Due to licensing and compliance reasons, the customer has requested that users connecting from external locations must NOT be presented with applications from the Microsoft Office suite.

How should the architect ensure that users are only presented with Microsoft Office applications when connecting to the environment from internal locations?

- A. Configure a separate Store for external connections, configure keywords on all Microsoft Office applications, and use Set-DSResourceFilterKeyword to enable filtering.
- B. Configure a separate Store for external connections, configure keywords on all Microsoft Office applications, and use Citrix ADC Content Switching to enable filtering.
- C. Use the existing Store for external connections, configure keywords on all Microsoft Office applications, and use Set-DSResourceFilterKeyword to enable filtering.
- D. Use the existing Store for external connections, configure keywords on all Microsoft Office applications, and use Citrix ADC Content Switching to enable filtering.

Correct Answer: B

QUESTION 5

Scenario: A Citrix Architect needs to manage the disaster recovery process for a XenApp and XenDesktop environment. The environment currently consists of an active datacenter which is typically accessed by users and a disaster recovery (DR) datacenter which would be used in the event that a disaster impacts the primary datacenter. The organization has made it a priority to minimize the loss of data when failing over between datacenters and has begun planning for an event in which the environment must fail over from the primary datacenter to the DR datacenter.

What is the appropriate sequence of steps that the architect should follow after getting management approval to complete the process in case of such an event?

- A. Block access to primary datacenter, complete replication, terminate/drain existing sessions, reverse direction of replication, enable access in DR datacenter
- B. Block access to primary datacenter, terminate/drain existing sessions, complete replication, reverse direction of replication, enable access in DR datacenter
- C. Terminate/drain existing sessions, complete replication, block access to primary datacenter, enable access in DR datacenter, reverse direction of replication
- D. Complete replication, terminate/drain existing sessions, block access to primary datacenter, reverse direction of replication, enable access in DR datacenter
- E. Complete replication; block access to primary datacenter, terminate/drain existing sessions, enable access in DR datacenter, reverse direction of replication
- F. Terminate/drain existing sessions; block access to primary datacenter, complete replication, reverse direction of replication, enable access in DR datacenter

Correct Answer: D
