QUESTION 1

Scenario: An administrator is setting up access for the User Support team. The administrator wants to give this team access to manage user sessions so that they can disconnect and either clear or log-off user sessions for troubleshooting purposes.

Which node would the administrator use in order to delegate these permissions in the AppCenter?

- A. Policies
- B. Servers
- C. Applications
- D. Administrators

Correct Answer: D

QUESTION 2

A XenApp administrator has been tasked with providing two factor authentication to a Web Interface server.

Which three types of two-factor authentication are supported by the Citrix Web Interface server by default? (Choose three.)

- A. Radius
- B. Authenex
- C. Safeword
- D. SecureStar
- E. RSA Secure ID

Correct Answer: ACE

QUESTION 3

An application is published to users using the '\\Streamed to client\\' delivery type.

Which two plug-ins are required and where are they required for this application? (Choose two.)

- A. Online plug-in on the client
- B. Offline plug-in on the client
- C. Offline plug-in on the XenApp server
- D. Online plug-in on the XenApp server

Correct Answer: AB

QUESTION 4

Scenario: The User Support Desk will be taking on frontline troubleshooting of the Citrix farms in response to user issues. The administrator wants the Support Desk staff to do basic user troubleshooting without having production server farm permissions. All users are added to an appropriate Active Directory group. Which step must the administrator take in the AppCenter to meet the requirements of the scenario?

- A. Assign Custom permissions
- B. Assign Full Administration permissions
- C. Assign the users to Read-Only permissions
- D. Assign a Custom Group Policy Object to the organizational unit of the group

Correct Answer: A

QUESTION 5

An administrator wishes to disable the prompt given to users when Flash content is displayed in their XenApp session without impacting the performance of Flash content.

See the attached exhibit to view the prompt window.

What should the administrator do to achieve this?

- A. Un-install the Flash player on the client PC.
- B. Un-install the Flash player on the XenApp server.
- C. Create a XenApp policy that enables Flash redirection.
- D. Create a client-side group policy to always use Flash redirection.

Correct Answer: D
