QUESTION 1

Scenario: Users are complaining of poor audio quality from their XenApp applications. They are using version 11 of the online plug-in. XenApp audio policy has been configured using the installation defaults.

What can the administrator do to improve audio quality?

- A. Upgrade the users\' online plug-in to version 13.
- B. Set the progressive compression to one level higher than the lossy compression.
- C. Configure a XenApp bandwidth limit policy and give audio redirection a 100% allocation.
- D. Create a XenApp Computer policy and increase the Windows Media Redirection buffer size to 10 seconds.

Correct Answer: A

QUESTION 2

When using the Gateway Direct secure access method in the Web Interface, the XenApp administrator must provide the _____ of the Access Gateway server. (Choose the correct option to complete the sentence.)

- A. IP address
- B. SSL certificate
- C. NetBIOS name
- D. Fully Qualified Domain Name (FQDN)

Correct Answer: D

QUESTION 3

Scenario: An administrator has a server farm with five servers. The administrator wants to limit the number of Microsoft Excel published application sessions that can be run in the server farm. Which two steps could the administrator take to meet this requirement? (Choose two.)

- A. Configure the Load Throttling rule.
- B. Configure the Server User Load rule.
- C. Configure the Application User Load rule.
- D. Assign a load evaluator to the five servers.
- E. Assign a load evaluator to the published application.

Correct Answer: CE

QUESTION 4

A Senior Administrator wants to give a Junior Administrator complete rights to a folder of applications while restricting some of his permissions to the overall farm. The Senior Administrator must grant _____. (Choose the correct option to complete the sentence.)

- A. Custom Permissions at the farm level and folder level
- B. Read Only Permissions at the farm level and Full Permissions at the folder level
- C. Custom Permissions at the farm level, then Full Permissions within the application folder
- D. Full Permissions at the farm level and then Custom Permissions within the application folder

Correct Answer: C

QUESTION 5

Which step(s) should an administrator take to publish applications that will be accessed through Web Interface and presented in different folders?

- A. Publish the applications as Content instead of Applications.
- B. Create a folder under the Application node and put the specific applications in the folder.
- C. In the application properties, in the location section, change the working directory to match the folder name.
- D. In the application properties, in the Shortcut presentation section, fill in a name for the Client application folder.

Correct Answer: D
