QUESTION 1

A Citrix XenApp administrator needs to apply a policy to all users regardless of connection type. Which type of policy should the administrator create?

- A. Unfiltered User policy
- B. Unfiltered Computer policy
- C. User policy filtered by worker group
- D. Computer policy filtered by worker group

Correct Answer: A

QUESTION 2

Scenario: An administrator needs to prepare a group of XenApp 6.5 servers for a scheduled maintenance window. The servers need to accept connections from users that already have existing sessions but disallow any new connections. The administrator also needs to ensure that the servers remain in maintenance mode after the software updates are performed, which will require multiple restarts. Which setting can the administrator use from the AppCenter?

- A. Prohibit logons only
- B. Drain until next restart
- C. Allow logons and reconnections
- D. Prohibit logons until server restart
- E. Prohibit logons and reconnections

Correct Answer: A

QUESTION 3

Scenario: A Citrix administrator is migrating the servers in his farm from XenApp 5 on Windows Server 2003 with HRP3 to XenApp 6.5 for Windows Server 2008 R2. In the XenApp farm, a Zone Preference and Failover policy was used.

Which policy should the administrator use to replace the Zone Preference and Failover policy?

- A. Citrix User
- B. Load Evaluator
- C. Load Balancing
- D. Citrix Computer

Correct Answer: C

QUESTION 4

Scenario: A Citrix XenApp administrator needs to apply a policy to all servers. The administrator needs to ensure that all servers always receive the required policy.

Which type of policy should the administrator create?

- A. Unfiltered User policy
- B. Unfiltered Computer policy
- C. User policy filtered by worker group
- D. Computer policy filtered by worker group

Correct Answer: B

QUESTION 5

Scenario: A company has two XenApp 6.5 farms and two Web Interface servers, each hosting a specific business application. Because of legal reasons, the applications CANNOT be delivered from a single farm. Users complain that they often use the wrong URL or do NOT see the application they require.

Which two tasks can an administrator complete to reduce the users' confusion? (Choose two.)

- A. Use a load balancer to provide a single URL to both Web Interface servers.
- B. On each Web Interface server, create a new Web Interface site for the alternate farm.
- C. On each Web Interface server, add a second farm that is configured with at least one XML gateway from the alternate farm.
- D. On each Web Interface server, modify the existing farm configuration and add at least one XML gateway from the alternate farm.
- E. Customize the Web Interface footer text on both Web Interface servers to remind the users of which applications are provided by the current server.

Correct Answer: AC
