QUESTION 1

How can database homes be pooled together into Database as a Service (DBaaS) pools by using the Enterprise Manager Cloud Control 12c self-service provisioning portal?

- A. They may be pooled together by major and maintenance release only if they are on the same operating system platform.
- B. They may be pooled together by major, maintenance, Fusion Middleware, and component- specific release if they are on different operating system platforms.
- C. Single-instance database homes of the same major, maintenance, Fusion Middleware, and component-specific release may be pooled together if they are on the same operating system platform.
- D. RAC database homes of the same major, maintenance, and component-specific release may be pooled together if they are on the same operating system platform.

Correct Answer: C

QUESTION 2

How can Enterprise Manager 12c Cloud Control self-service chargeback metering data be accessed by external billing systems?

- A. By using an RSS feed from the Chargeback home page
- B. By defining the external billing system as an Enterprise Manager target that may connect to the Chargeback application
- C. By running emcli get_metering_data and importing the output into the billing system as required
- D. By defining the external billing system as an Enterprise Manager target that then uses a 81 Publisher report to obtain the billing data

Correct Answer: B

QUESTION 3

You are asked to propose Cloud computing solution for your company that will potentially lower costs and improve productivity of your IT department.

Which two features of the Cloud computing model would help achieve these aims?

- A. Consolidation
- B. Abstraction
- C. Self Service
- D. Service Level Agreements

Correct Answer: AC

QUESTION 4

In which two ways can an Oracle Database be provisioned using Cloud Service Models that are supported by Enterprise Manager Cloud Control 12c?

- A. Using Software as a Service to deploy a virtual machine image that has an Oracle Database installation already configured
- B. Using Platform as a Service to deploy an Oracle Database
- C. Using Infrastructure as a Service to deploy a virtual machine image that has an Oracle Database installation already configured
- D. Using SQL as a Service to deploy an Oracle Database

Correct Answer: BC

QUESTION 5

Which three can be presented to Enterprise Manager Cloud Control 12c self-service portal users by using Database as a Service (DBaaS) self-service provisioning?

- A. Individual single-instance database homes
- B. Database deployment procedures
- C. Pools of single-instance database homes
- D. Individual RAC database homes
- E. Pools of RAC database homes

Correct Answer: ABD
