QUESTION 1

Identify three benefits of Unified Auditing.

- A. Decreased use of storage to store audit trail rows in the database.
- B. It improves overall auditing performance.
- C. It guarantees zero-loss auditing.
- D. The audit trail cannot be easily modified because it is read-only.
- E. It automatically audits Recovery Manager (RMAN) events.

Correct Answer: BDE

QUESTION 2

Which three true about recovering tables using RMAN? (Choose three.)

- A. RMAN can recover tables in the SYSAUX tablespace.
- B. RMAN can recover tables owned by the SYS user.
- C. RMAN can recover tables in the SYSTEM tablespace.
- D. RMAN always uses an auxiliary instance.
- E. RMAN can recover tables in a standby database.
- F. RMAN can recover a table after a DDL operation has altered the table structure.
- G. RMAN can recover tables owed by the SYSTEM user.

Correct Answer: DFG

- A. RMAN can recover tables in the SYSAUX tablespace. - WRONG
- B. RMAN can recover tables owned by the SYS user. - WRONG
- C. RMAN can recover tables in the SYSTEM tablespace.- WRONG
- D. RMAN always uses an auxiliary instance.
- E. RMAN can recover tables in a standby database.- WRONG
- F. RMAN can recover a table after a DDL operation has altered the table structure.
- G. RMAN can recover tables owed by the SYSTEM user.

22.1.4 Backup Guide

QUESTION 3

You notice that the performance of your production 24x7 Oracle 12c database has significantly degraded. Sometimes, you are not able to connect to the database instance because it hangs. How can you detect the cause of the degraded performance?

- A. by performing emergency monitoring using Real-Time Automatic Database Diagnostic Monitor (ADDM) to fetch data directly from SGA for analysis
- B. by running ADDM to fetch information from the latest Automatic Workload Repository (AWR) snapshots
- C. by using Active Session History (ASH) data and performing hang analysis
- D. by running ADDM in diagnostic mode

Correct Answer: A

QUESTION 4

(Choose two) You configured the Fast Recovery Area (FRA) for your database. The database instance is in ARCHIVELOG mode. The default location for the archived redo log files is the FRA.

Which two files are removed automatically if space is required in the FRA as per the retention policy?

- A. user-managed backups of data files and control files
- B. flashback logs
- C. RMAN backups that are obsolete
- D. archived redo log files that have multiple copies in a different archive location

Correct Answer: BC

QUESTION 5

Which three are true about opatchauto? (Choose three.)

- A. It performs a shutdown and then a restart of all processes in both Oracle Grid Infrastructure and Oracle Database home during the patching process.
- B. It must be invoked by a user with root user privileges.
- C. Patches are applied via opatchauto.
- D. Users must always input patch plans to opatchauto.
- E. It requires the Oracle Grid Infrastructure and Oracle Database instances to be shut down before being invoked.
- F. It applies patches in nonrolling mode by default.
- G. It is used to apply interim patches to Oracle Grid Infrastructure and Oracle Database home combinations.

Correct Answer: ABG

- A. It performs a shutdown and then a restart of all processes in both Oracle Grid Infrastructure and Oracle Database home during the patching process. => True
- B. It must be invoked by a user with root user privileges. => true
- C. Patches are applied via opatchauto. => not always.
- D. Users must always input patch plans to opatchauto. => false, patch plans is optional
- E. It requires the Oracle Grid Infrastructure and Oracle Database instances to be shut down before being invoked. => false
- F. It applies patches in nonrolling mode by default. => false, default is rolling mode.
- G. It is used to apply interim patches to Oracle Grid Infrastructure and Oracle Database home combinations. => true

Correct: A,B,G Reference:
