QUESTION 1

Identify the two capabilities that the Application Development Framework Desktop Integration (ADFDI) framework provides for Work Definitions in Manufacturing Cloud.

- A. You can mass create and update work definitions and their operations, items, and resources.
- B. You can mass create and update work definitions and their operations, items only and cannot add resources in work definitions.
- C. You can mass create and update work definitions and their operations only and cannot add items and resources in work definitions.
- D. You can copy work definitions form one organization to another organization.

Correct Answer: AD

QUESTION 2

During a Manufacturing Cloud implementation, the Production Supervisor wants to close the work orders for last month and wants to make sure that the work orders include the correct cost.

Identify the approach to be taken by the Production Supervisor.

- A. The Production Supervisor need not include cost variances while costing last month's work orders because those can be applied directly in subledger accounting.
- B. The Production Supervisor needs to include all costs and variances in last month's work orders and close them; however, the work orders where updates are expected, should not be closed.
- C. The Production Supervisor should make sure that all costs are included while closing last month's work orders; however, variances can be included after closing the work orders.
- D. Work order costs can be updated anytime regardless of the status of the work order.

Correct Answer: B

QUESTION 3

One of the key execution capabilities that Oracle Manufacturing Cloud offers is that you can generate and manage work order exceptions.

Which option shows the production exception types that can be reported by the production operator?

- A. Work Area, Work Center, and Resources
- B. Work Center and Resources
- C. Resources and Components
- D. Work Area, Work Center, Resources, and Components

E. Work Area, Work Center, Resources, Components, and Miscellaneous

Correct Answer: C

QUESTION 4

Your customer has multiple distribution centers and a few manufacturing plants. Plants make different items with some overlap between them in terms of products manufactured. The distribution centers stock parts from all plants. A Corporate Engineering team is responsible for centrally defining items and catalogues. This team defines the items and sets the attributes for most parameters. The respective distribution centers and manufacturing plants are allowed to change some attributes locally. Identify two different ways of achieving this requirement.

- A. Set up Plants as Inventory Organizations, Distribution Centers as Item Organizations, and Corporate Engineering organization as Inventory Organization.
- B. Set up Plants as Inventory Organizations, Distribution Centers as Inventory Organizations, and Corporate Engineering organizations as Item Organization.
- C. Set up Plants and Distribution Centers as Inventory organizations and Corporate Engineering organization as Item Organization
- D. Set up Plants and Distribution Centers as Inventory organizations and Corporate Engineering organization as Inventory Organization.
- E. Set up Plants as Inventory Organizations, Distribution Centers as Item Organizations, and Corporate Engineering organization as Item Organization.

Correct Answer: BC

QUESTION 5

Identify the two configurations in Supply Chain cloud applications of Product Information Management (PIM) and Order promising (GOP), which must be set to process the Back-to- Back order with Make Supply Order, for a nonstocked item.

- A. Set the nonstocked item to be back-to-back enabled in Product Information Management (PIM).
- B. Set the global sourcing rule in GOP to determine supply creation option as Make.
- C. Set a local sourcing rule in GOP to determine supply creation option as Make.
- D. Create Supply Order Orchestration Defaulting and Enrichment Rule for the nonstocked item.
- E. Create Supply Chain Orchestration Supply Execution Document Creation Rule for the nonstocked item.

Correct Answer: AB
