### QUESTION 2

Your customer wants you to restrict the values of Receivables Transaction Type for their three business units. You created three reference data sets for each business unit. However, the user is still able to see the values in the Transaction Type list of values which are not defined in the business unit data set.

What is the reason for this behavior?

- A. The user has multiple Business Unit Roles and, therefore is able to see additional values.
- B. Reference Data Sets cannot be used uniquely across business units. They can only be used at the Legal Entity level.
- C. Receivables Transaction Types are common across business units.
- D. The user is seeing the values defined in the common set. The values should be removed from the common set.

Correct Answer: C

#### QUESTION 5

While performing the task "Create Chart of Accounts, Ledger, Legal Entities, and Business Units in Spreadsheet Task", you did not provide the functional currency; however, you mentioned that the legal entity country is the United States of America.

What will be the functional currency of the ledger you are defining?

A. It is mandatory to provide functional currency, because ledger cannot be defined without functional currency. The system will throw an error Upon processing.

B. The system will ask the user to provide functional currency at the time of uploading the spreadsheet if it is not provided in the first place.

C. The system will pick the first available currency from the List of Values.

D. It is mandatory to provide functional currency because ledger cannot be defined without functional currency. The system will throw an error upon upload of the spreadsheet because all required fields are not populated.

E. The system will automatically pick "USD" as functional currency from the legal entity country.

Correct Answer: A
