-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Which four are valid for integration using Service Oriented Architecture Cloud Service (SOACS)?

- A. Retrieve/Update supported data elements on the SaaS applications using REST Services in real time.
- B. SOACS has read access to HCM and ERP Cloud (SaaS) Applications data.
- C. Create Files in the required format and Orchestrate PBL data loads into the HCM/ERP Cloud.
- D. Create Files in the required format and Orchestrate FBDL data loads into the HCM/ERP Cloud.
- E. Create Files in the required format and Orchestrate ADFDi data loads into the HCM/ERP Cloud.
- F. Create Files in the required format and Orchestrate HDL data loads into the HCM/ERP Cloud.

Correct Answer: ABEF

QUESTION 2

Oracle SOA Cloud Service (SOA CS) includes a number of built-in adapters to include all of the technology adapters delivered with SOA Suite.

When using one of these technology adapters in a composite application deployed in SOA CS, which two are valid approaches for facilitating connectivity to on-premises applications and systems?

- A. WLST script
- B. VPN service
- C. PL/SQL procedure
- D. SSH tunnel
- E. SOA on-premises connectivity agent

Correct Answer: BD

Explanation: Oracle SOA Cloud Service includes a number of adapters. All of the technology adapters delivered with SOA Suite are available for Oracle SOA Cloud Service, Service Bus, and SOA Suite domain types. Connectivity to on-premises applications should be verified, and either SSH tunnels or VPN service should be used for connectivity to on-premises applications.

QUESTION 3

You want to configure SOA Cloud Service instance to allow for a cluster of three WebLogic server instances.

Which is a valid consideration when configuring the Load Balancer within your SOA instance?

- A. Load balancer configuration may only be configured after the SOA instance cluster has been provisioned.
- B. Each load balancer node will share the same public IP address utilizing virtual routing redundancy protocol (VRRP).
- C. ASOA instance can include up to three load balancer virtual machine nodes.
- D. Oracle Traffic Director (OTD) is the only available implementation option.

Correct Answer: A

QUESTION 4

Which two statements correctly define the use cases for Business Process Execution Language(BPEL) vs. Business Process Modeling Notation (BPMN) vs. Enterprise Service Bus (ESB)?

- A. Decision Model and Notation (DMN) replaces BPMN in modern Cloud Architectures.
- B. All are part of a typical/traditional on-premise enterprise integration strategy and can also be an important part of a hybrid on-premises/Cloud architecture.
- C. BPEL is inherently better than BPMN in managing orchestrations that involve people, because BPEL can also interact with systems.
- D. An ESB is used primarily for stateless messages and service mediation. The ESB construct is being replaced by APIs and API Gateways in modern Cloud architectures.
- E. BPEL and ESB are both good technologies for doing heavy transformations of data before sending the data to a back-end system or database.

Correct Answer: DE

QUESTION 5

You have been tasked with provisioning a Managed File Transfer (MFT) Cloud Service on Oracle Cloud Infrastructure (OCI).

Which of provisioning requirement is NOT valid?

- A. You are required to obtain an authentication token for an Object Storage bucket within an accessible OCI compartment.
- B. You can use any Oracle Database instance running in either OCI or OCI Classic.
- C. You must create a Virtual Cloud Network in OCI with at least two subnets.
- D. Provisioning MFT requires creating a SOA Cloud Service instance in OCI choosing "MFTCluster" as a service type.

Correct Answer: C
