Your IT department wants to cut down storage costs, but also meet compliance requirements as set up by the central audit group. Your IT departments wants to keep all other files for 365 days only. What two steps can you take to meet this requirement?

- A. Create Object Storage Lifecycle rules to archive objects from the legacy bucket after 365 days without any pattern matching
- B. Create Object Storage Lifecycle rules to delete objects from the legacy bucket after 365 days with a filter type - include by pattern: "\\\*.docx"
- C. It is not possible to meet this requirement
- D. Create Object Storage Lifecycle rules to delete objects from the legacy bucket after 365 days with a filter type - exclude by pattern: "\\\*.xlsx"
- E. Create Object Storage Lifecycle rules to delete objects from the legacy bucket after 365 days without any pattern matching

Correct Answer: BD

Object Lifecycle Management lets you automatically manage the archiving and deletion of objects. By using Object Lifecycle Management to manage your Object Storage and Archive Storage data, you can reduce your storage costs and the amount of time you spend managing data. Use object name filters to specify which objects the lifecycle rule applies to. You can add object filters in any order. Object Lifecycle Management evaluates the precedence of the rules as follows: Pattern exclusions Pattern inclusions Prefix inclusions
