QUESTION 1

A customer wants an email notification sent when the performance of their enterprise application is poor. How should you configure and accomplish that function using the Oracle Management Cloud (OMC)?

- A. Create an APM Alert Rule to send a notification when the request response time is longer than a predefined value.
- B. Configure the IT Analytics Performance Analytics: Middleware dashboard to send application performance notifications.
- C. Create a Log Analytics rule to send a notification when performance error occurs in the application server logs.
- D. Create an OMC Alert Rule to send a notification when a page response time is longer than a predefined value.
- E. Create an Application Performance Monitoring (APM) Application Definition to notify users when performance is below a predefined value.

Correct Answer: C

QUESTION 2
