QUESTION 1

Which of the following services are NOT Security Services in OCI ? Select TWO answers.

- A. Data Guard
- B. Cloud Guard
- C. Vault
- D. Block Volume

Correct Answer: AD

QUESTION 2

You want to include all instances in any of two or more compartments, which syntax should you use for dynamic policy you want to create for "Prod" compartment and "SIT" compartment?

Prod OCID : `JON.Prod`

SIT OCID : `JON.SIT`

- A. Any { instance in compartment `Prod` and Compartment `SIT` }
- B. Any { instance.compartment.id = `JON.Prod`, instance.compartment.id = `JON.SIT` }
- C. All { instance.compartment.id = `JON.Prod`, instance.compartment.id = `JON.SIT` }
- D. All { instance in compartment `Prod` and Compartment `SIT` }

Correct Answer: B

— Include All Instances in Any of Two or More Compartments

To include all instances that reside in any of two (or more) compartments, add a rule with the following syntax:

```
Any {instance.compartment.id = '<compartment_ocid>', instance.compartment.id = '<compartment_ocid>'}
```

separating each compartment entry with a comma.

You can type the rule directly in the text box, or you can use the [rule builder](#).

Example entry in the text box:

QUESTION 3

Which architecture is based on the principle of "never trust, always verify"?

- A. Federated identity
- B. Zero trust
- C. Fluidperimeter
- D. Defense in depth

Correct Answer: B

Enterprise Interest in Zero Trust is Growing Ransomware and breaches are top of the news cycle and a major concern for organizations big and small. So, many are now looking at the Zero Trust architecture and its primary principle "never trust, always verify" to provide greater protection. According to Report Linker, the Zero Trust security market is projected to grow from USD 15.6 billion in 2019 to USD 38.6 billion by 2024 and that sounds right based on the large number of companies pitching their Zero Trustwares at RSA 2020. The enterprise was well represented at the conference and there was a tremendous amount of interest in Zero Trust. Interestingly, even though Zero Trust environments are often made up of several solutions from multiple vendors it hasn't prevented each of the vendors from evangelizing their flavors of Zero Trust. This left the thousands of attendees to attempt to cut through the Zero Trust buzz and noise and make their own conclusions to the best approach.

QUESTION 4

Which components are a part of the OCI Identity and Access Management service?

- A. Policies
- B. Regional subnets
- C. Compute instances
- D. VCN

Correct Answer: A

QUESTION 5

What does the following identity policy do?

Allow group my-group to use fn-invocation in compartment ABC where target.function.id = `\\`

- A. Enables users in a group to create, update, and delete ALL applications and functions in a compartment
- B. Enables users to invoke all the functions in a specific application
- C. Enables users to invoke just one specific function
- D. Enables users to invoke all the functions in a compartment except for one specific function

Correct Answer: C
