QUESTION 1

Which two statements are true about WebLogic data sources?

- A. Data sources are targeted to a domain.
- B. Data sources are bound in the JNDI tree of a server.
- C. Data sources are based on the JMS specification.
- D. A data source contains a connection pool.
- E. A domain requires at least one data source.

Correct Answer: BD

QUESTION 2

You are creating and configuring a cluster by using the administration console. Which two statements are true?

- A. All servers that will be part of the cluster must be created before the cluster is created.
- B. You must pick the cluster messaging mode.
- C. Even though you create a non dynamic cluster, you can change it to a dynamic cluster later.
- D. Once the cluster is created, you cannot change its messaging mode.
- E. The administration console does not provide a way to manually migrate singleton services. It must be set up to be done automatically or by using WLST.

Correct Answer: BC

QUESTION 3

You are working for a software company that mostly dealt with creating and reusing C++ and .NET objects. There are many COM (Component Object Model) components that have been created over time that provide standardized functionalities. Recently, platform independence has become a major consideration for your organization and you have deployed WebLogic server 12c. But you would like to make use of some of your prebuilt COM objects for request processing. You need an interim solution before implementing web services.

Which artifact within WebLogic server helps you achieve your objective?

- A. Messaging Bridge
- B. IDL Mapper
- C. jCOM
- D. XML Registry

E. COM2 Java

Correct Answer: E

QUESTION 4

Select two true statements about WebLogic Server's role in transaction management. (Choose two.)

- A. You can configure WebLogic Server JTA properties at the domain, cluster, and server level
- B. WebLogic Server can act as the transaction manager for multiple transactional resource managers during a distributed transaction
- C. WebLogic Server supports transactional work managers
- D. Starting with WebLogic Server 12c, you can create two kinds of clusters: the "standard" cluster, as in previous versions, and the new transactional cluster
- E. WebLogic Server supports transactional Enterprise Java Beans

Correct Answer: AC

QUESTION 5

You shut down a managed server by using the administration console. Which statement is always true?

- A. The managed server was running on the same machine as the administration server.
- B. Node Manager is configured properly and running on the managed server's machine.
- C. You can choose to shut down the server right away or after it completes its work.
- D. The administration console calls WLST to accomplish the shutdown.

Correct Answer: C
