### QUESTION 1

Your company assigns three possible credit ratings to customers: Poor, Good, and Excellent (represented numerically by 1, 2, and 3). The DBA has just added a RATING column to the CUSTOMERS table and has asked you to add an item to your form so that credit ratings can be recorded. To restrict data entry clerks to one of these three values, you decide to create a radio group for the Rating item. You want to allow for an undetermined (Null) credit rating, and users should be able to update the credit rating from a value to an undetermined rating.

How can you implement this?

- A. Create three radio buttons for each of the credit ratings, and set the Mapping of Other Values for the radio group to Null.
- B. Create three radio buttons for each of the credit ratings, and set the Mapping of Other Values for the radio group to one of the credit rating values.
- C. Create four radio buttons, and leave blank the value for the undetermined credit rating.
- D. Choose a different type of input item, because radio groups do not allow entry and update of null values.

Correct Answer: C

---

### QUESTION 2

You created a query Record Group at design time.

Which built-in can you use to execute the query defined in the Record Group object?

- A. ADD\_GROUP\_ROW
- B. POPULATE\_GROUP
- C. ADD\_GROUP\_COLUMN
- D. SET\_GROUP\_SELECTION
- E. CREATE\_GROUP\_FROM\_QUERY
- F. POPULATE\_GROUP\_WITH\_QUERY

Correct Answer: B

---

### QUESTION 3

You are developing an Order Entry application. The Customers form calls the Orders form and passes the value of Customer\_Id as a parameter by the same name, so that the orders for only that customer are layed.

Which three statements are true? (Choose three).

- A. You must create the parameter at design time in the Customers form.
- B. You must create the parameter at design time in the Orders form.
- C. You must create the parameter programmatically in the Customers form.
- D. You must create the parameter programmatically in the Orders form.
- E. You can programmatically refer to the parameter as :parameter.customer\_id in the Customers form.
- F. You can programmatically refer to the parameter as :parameter.customer\_id in the Orders form.

Correct Answer: BCF

#### QUESTION 4

You start an OC4J instance on your development PC and then run a form from the Forms Builder. Which statement describes the behavior of OC4J?

- A. It appears in the Forms Builder window, which you can minimize after OC4J starts.
- B. It appears in a separate window, which you can close after OC4J starts.
- C. It appears in the Forms Builder window, which you can close after OC4J starts.
- D. It appears in a separate window, which you should not close or the OC4J instance will abort.
- E. It appears in a separate window, which you should not minimize or the OC4J instance will abort.

Correct Answer: D

#### QUESTION 5

View the Exhibit.

The Credit\_Rating item in the Customers block of an Order Entry form must be restricted to three possible values: Good, Poor, or Null (the latter value indicates that the credit rating has not been determined). Order entry clerks must be able to update this item to any of these three values.

You want to change the item to a check box labeled "Credit Risk" that should be selected if the customer has poor credit. The check box should not be selected if the customer's credit rating is good or undetermined.

You change the item type to Check Box and set other properties as shown in the exhibit, then run your form and insert three records: two with good credit and the check box clear, and one with poor credit and the check box selected. You commit the data and query the records, with the following result set:

CUST\_ID LAST\_NAME FIRST\_NAME CREDIT\_RATING -----

1001 Gamer Pam 1002 Wallace Sheila 1003 Maslen Glenn Poor

The first two records show an undetermined credit rating, although your intention was to set the value to Good for those customers. What change must you make in the properties of the Credit\_Rating item to enable values of Good, Poor, and Null to be entered?

Label	Credit Risk
Access Key	
Implementation Class	
Value when Checked	Bad
Value when Unchecked	Good
Check Box Mapping of Other Values	Unchecked
Popup Menu	<Null>
<b>Navigation</b>	
Keyboard Navigable	Yes
Mouse Navigate	Yes
Previous Navigation Item	<Null>
Next Navigation Item	<Null>
<b>Data</b>	
Data Type	Char
Data Length Semantics	BYTE
Maximum Length	4
Initial Value	

- A. Change the Initial Value property to Good.
- B. Change the Check Box Mapping of Other Values property to Not Allowed.
- C. Change the Initial Value property to Good and the Value When Unchecked property to Null.
- D. Change the Initial Value property to Good and the Check Box Mapping of Other Values property to Null.
- E. Change the Initial Value property to Good and the Check Box Mapping of Other Values property to Checked.
- F. Change the item type. It is not appropriate to use a check box to enable entry and update of more than two values in an item.

Correct Answer: F
