QUESTION 1

You are running multiple policy modeling projects and are using the collaboration and inclusions functionality to ensure consistent screen wording and reuse. You have a "corporate reference" project that contains some standard interview screens used in all Policy Modeling projects for your company.

Your company has had some policy changes and you are required to change the wording and layout on the common screens for all Policy Modeling projects. The changes are required immediately.

How can you achieve this using the minimum number of steps?

A. Update the corporate reference project in Policy Modeling, then upload the new version to the Hub. Deploy the new version of the corporate reference project and the changes will then be automatically propagated to all other Policy Modeling projects.

B. Update the corporate reference project and upload the new version to the Hub. Remove and then add the inclusions for all of the other projects, because inclusions will not merge screens.

C. Copy the screens from the Corporate project into all of the other Policy Modeling projects individually, and then click the Add button on the Inclusions tab for each project.

D. Update the corporate reference project and upload the new version to the Hub. Update all of the other projects individually by clicking the Update button on the Inclusions tab.

E. Update the corporate reference project and upload the new version to the Hub. Update all of the other projects individually by clicking the Reset button on the Inclusions tab.

Correct Answer: E

QUESTION 2

Consider the following excerpt from source material for a building permit:

"The City believes that the beauty of its lands is important. Any owner of an existing building that exceeds threes stories within city limits must pay an additional yearly fee. The fee is $100 for every story in excess of 3."

A rule concludes: An owner must pay an additional fee yearly fee if _____.

Which three options complete the conditions for this rule based on the requirements?

A. the building is an existing building

B. the building is located within city limits

C. the city believes the beauty of its lands is important

D. the number of building stories > 3

E. the fee = (the number of building stories ?3)*100

Correct Answer: ABD

QUESTION 3

Which four are valid reasons to split an existing Word document containing rules in your Oracle Policy Modeling project?

A. Two developers need to work simultaneously on different areas of rules that were originally within the same Word document.

B. You want to use the Debugger to test your rules.

C. You want to separate rules with different purposes.

D. Editing the new documents is easier in Microsoft Word because the original document was getting too large.

E. You want to add comments and footnotes to your rules.

F. You want to exclude part of the original document from the policy model.

G. You want to mirror updates to the source material that has divided the source of your rules into two locations.

H. You want to define screens to run in Oracle Web Determinations.

Correct Answer: CFGH

QUESTION 4

You are working in a policy model in which the entity "the parent" has a one-to-many relationship ("the parent\\'s children") with the entity "the child". You need to develop a rule that proves the attribute "the parent has put all of the kids to bed", based on the attribute "the child is in bed".

Which is the correct rule?

A. the parent has put all of the kids to bed if
    ForAll(the parent's children)
        the child is in bed

B. the parent has put all of the kids to bed if
    For(all of the parent's children), the child is in bed

C. the parent has put all of the kids to bed if
    ForAll(the parent's children, the child is in bed)

D. the parent has put all of the kids to bed if
    InstanceAll(the parent's children, the child is in bed)

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: B

QUESTION 5

You have a number attribute "the child\\'s age in years". In an interview, you want to ensure that the user is only able to enter ages between 0 and 15.

What are the three methods to achieve this?

A. Specify the maximum and minimum values within the Edit Attribute dialog box.

B. Write a warning event rule.

C. Use a regular expression within the Edit Attribute dialog box.

D. Write an error event rule.

E. Create a number value list with the allowed ages, then associate the list with the child\\'s age attribute.

Correct Answer: ADE
