QUESTION 1

When creating your rules, you have used the attribute "the gun fired accidentally". When adding this input to a screen, you notice that the question form of this attribute is "Is the gun fired accidentally true?".

In which way should you resolve this issue to ensure that the word "true" is not included in any text shown to the interview user (including explanations)?

- A. Add the verb "to fire" and change the attribute sentence forms in the Edit Attribute dialog box.
- B. Remove the word "accidentally" from the attribute text.
- C. Create a custom attribute text in the Edit Attribute dialog box.
- D. Add the verb "to fire".
- E. Change the question text on the screen.

Correct Answer: C

QUESTION 2

You just developed a policy model and need to test a discrete portion of the rules without using screens.

Identify the correct process.

- A. Go to Build > Test Data Model and enter the discrete portion of the rules that you want to test and assign values.
- B. Go to Build > Build and Debug and select Build and Debug without screens in the Oracle Policy Modeling Testing window.
- C. Go to Test > Discrete data Sets > and set the entity and attribute values that you want to test in the Rule Testing window.
- D. Go to Debug > Data > and set the entity and attribute values that you want to test in the Oracle Policy Modeling Debugger window.

Correct Answer: C

QUESTION 3

Which two statements are correct for a Policy Automation project team?

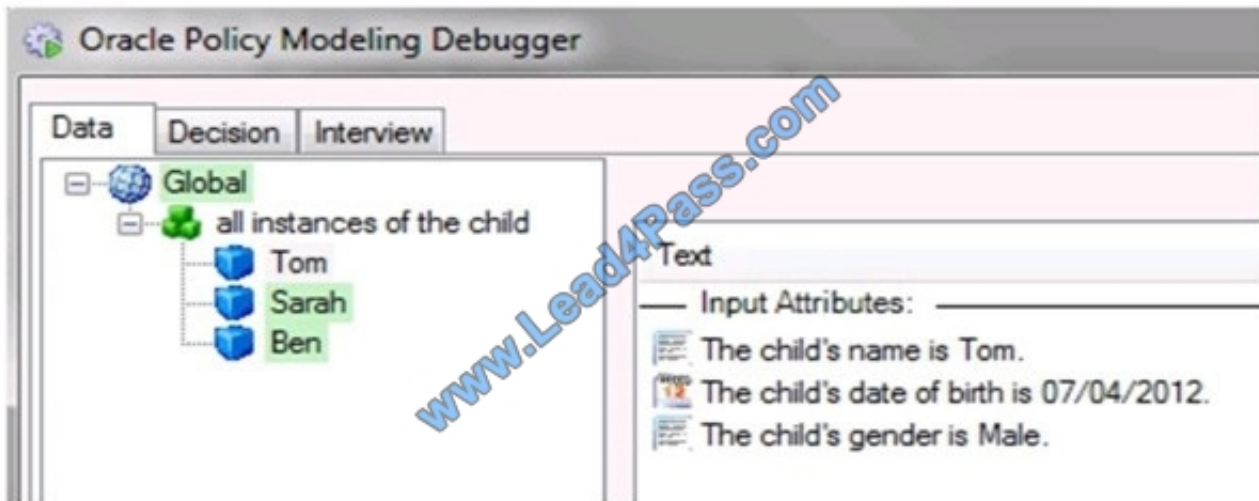

- A. It is common for the rule author to be the lead tester.
- B. Subject matter experts may advise on policy interpretation, but they should not write the Policy Automation rules.
- C. It is common for the rule author to create the interview screens.
- D. The primary user of Policy Modeling on a project should be the technical developer.

- E. Policy Automation projects must have multiple rule authors.
- F. Policy Automation project teams typically include both technical and nontechnical roles.

Correct Answer: AC

QUESTION 4

Assuming each child has a unique date of birth, which set of Policy Modeling functions should you use to determine the same of the youngest female child?

- A. Exists, InstanceMinimumIf
- B. InstanceMinimumIf, InstanceValueIf
- C. InstanceValueIf, InstanceMinimum
- D. Minimum, InstanceValue
- E. ForAll, InstanceValueIf

Correct Answer: B

QUESTION 5

You are given the following source material.

"The store must comply with the working regulations which are as follows. Employees under the age of 16 on the date they joined the company must not work more than 20 hours in any week. All other employees must not work more than 48 hours in any given week, unless they have chosen to opt out of the Working Time Directive regulations. Note the option to opt out is not available to employees under the age of 21."

You have created a policy model from the above source material, and have created and used all of the attributes below. Your rules include an entity of "the employee".

Which four are the minimal set of input attributes?

- A. the number of hours the employee has worked in the week
- B. the employee was aged under 16 on the date they joined the company
- C. the employee has worked more than 48 hours in the week
- D. the interview is complete
- E. the employee is eligible to opt out of the Working Time Directive regulations
- F. the employee has opted out of the Working Time Directive regulations
- G. the employee's date of birth
- H. the date the employee joined the company
- I. the store complies with the working regulations

Correct Answer: CEF GH
