QUESTION 4

Which two statements are correct when designing screens?

- A. Boolean attributes can be used to set dynamic default values for date or number fields.
- B. You can set an input question to appear based on the value of another Boolean input on the same interview screen.
- C. Input controls can be set to display conditionally using the attribute editor in the Data tab.
- D. You can specify an input question should be read-only based on the value of another non-Boolean Value list input on the same interview screen.
- E. If an attribute has a static default value defined, this will always override any dynamic default.
- F. Only attributes with defined names can be used when setting conditional visibility on screens.

Correct Answer: AF

QUESTION 5

You have a source material for your policy model that reads as follows:

"Only families who meet the minimum work and education requirement are eligible for the competitiveness credit. A family meets the work and education requirement if all of its members are either gainfully employed or enrolled in a full-time study program. Families in which a member does not meet the requirement but is actively searching for a job can apply for a waiver".

Which statement describes the entity structure that your policy model should have?

- A. The rules will infer the necessary entities by using automatic data types.
- B. Create an entity for "the family member" an entity for "the family", and an entity for "the minimum work and education requirement".
- C. Create an entity for "the family member" and use the global entity.
- D. Create an entity for "the family member" and an entity for "the family".

Correct Answer: B
