QUESTION 1

Which option tag is used for reliability of provisional responses in SIP messages?

- A. 100rel
- B. Prack
- C. Rel
- D. Supported
- E. Required

Correct Answer: A

QUESTION 2

When SNMP access is enabled to the Session Border Controller, which statement is TRUE?

- A. There are no default community strings.
- B. Only one trap receiver can be configured.
- C. The default community strings are acme and packet.
- D. The default community strings are public and private.
- E. Community strings are in passive mode.

Correct Answer: C

QUESTION 3

Which two statements regarding SIP processing are TRUE?

- A. An initial INVITE will contain a From header tag and a To header tag as a globally unique identifier for the dialog.
- B. A CANCEL method can terminate a dialog.
- C. The combination of the To tag, From tag, and Call-ID completely defines a peer-to-peer SIP relationship and is referred to as a dialog.
- D. To avoid retransmissions, User Agents must forward received 100 Trying messages to their next hop.
- E. SIP sessions are terminated and re-originated as new sessions as they are routed through the Session Border Controller.

Correct Answer: AC

QUESTION 4

When working in the Session Border Controller's OS environment, which is FALSE?

- A. Every IP address referenced in a SIP configuration object must be defined as an IP address in the corresponding network-interface object
- B. IP addresses defined in steering pools do not need to be defined as part of the network- interface configuration object.
- C. An IP address to enable telnet to a network-interface must be defined appropriately in the corresponding network-interface object.
- D. The local-address of an h323-stack does not need to be defined in the corresponding network- interface object.
- E. The local-address of an MGCP gateway IP does not need to be defined in the corresponding network- interface object.

Correct Answer: A

QUESTION 5

A session agent group (SAG) allows for the creation of a logical grouping of session agents.

Which two options are valid for the "strategy" parameter in the session-group to route traffic?

- A. propdist
- B. lowsusrate
- C. mostbusy
- D. lastused
- E. mostfree

Correct Answer: AD
